

# NATIONAL PRIORITY GENDER EQUALITY INDICATORS

Illuminating the path towards Gender Equality in Uganda

December 2018

# National Priority Gender Equality Indicators (NPGEI)

December 2018

## Statement by the of minister gender, labour and social development

---

Uganda has registered tremendous progress in pursuing gender equality and the empowerment of women and girls. This progress is attributed to the political support and policy directives of the National Resistance Movement (NRM) Government which has upheld the principle of inclusive development that ensures that no one is left behind! This principle is firmly enshrined in the Constitution of the republic of Uganda, the Uganda Gender Policy 2007 (UGP) and other sector policies to ensure sustainable development. The NDP II recognized that ‘attainment of gender equality and empowerment of women is a pre-requisite for accelerated socio-economic transformation’.

It is within this context that my Ministry has collaborated with the Ministry of Finance Planning and Economic Development (MFPED), Uganda Bureau of Statistics (UBOS), the School of Women and Gender Studies (SWGS) Makerere, and the UN Women to develop the National Priority Gender Equality Indicators (NPGEIs), that are harmonized with other indicator frameworks including the National Standard Indicators, the National Development Plan (NDP II) Monitoring and Evaluation Framework, the Sector Development Plans and the Sustainable Development Goals (SDGs).

It is important to note that attainment of the strategic objective of NDP II and through this the SDGs, will only be achieved when we take deliberate actions to address gender inequalities in all sectors through the gender sensitive Sector and Local Government Development plans and budgets.

I pledge the full cooperation of my Ministry with all the stakeholders in this endeavor to ensure that the National Priority Gender Equality Indicators are used to monitor Uganda’s progress to delivering on gender equality and empowerment of women and girls in line with our national, regional and global commitments.

**Hon. Janat B. Mukwaya (Hajati)**  
**Minister**  
**Ministry Gender, Labour and Social Development**

## Statement by the UN Women Country Representative

---

In September 2015, the United Nations General Assembly adopted by consensus Resolution 70/1: Transforming our world: the 2030 Agenda for Sustainable Development (the 2030 Agenda). The Resolution states that “realizing gender equality and the empowerment of women and girls will make a crucial contribution to progress”. The prioritization of gender equality and women’s rights is reflected in a cross-cutting manner throughout every part of the 2030 Agenda. Quality data are of critical importance in determining whether policy efforts are adequately marshalled, and that the goals and targets are being achieved. Thus, the demand for disaggregated statistics have increased as Uganda implements the SDGs.

UN Women through the Flagship Programme Initiative “Making every Woman and Girl Count: Supporting the Monitoring and Implementation of the SDGs through Better Production and Use of Gender Statistics”, aims to ensure that gender responsive statistics are available, analysed, and made accessible to inform policy making for delivering gender equality and women empowerment. The process of localizing the SDG indicators which was started in 2016, was conducted in a participatory manner involving a wide range of stakeholders and was endorsed by the Government of Uganda.

UN Women supported the Uganda Bureau of Statistics (UBOS) to develop the first set of National Priority Gender Equality Indicators (NPGEI) in 2016. These indicators are aligned to the second National Development Plan (NDP II) of Uganda. UN Women further supported UBOS to update the NPGEIs, to take care of emerging issues in the data and development arenas.

UN Women acknowledges the active participation and commendable cooperation of the representatives of the government and development partners for making this effort successful. UN Women is also grateful to the financial contribution from the UK Department for International Development (DFID), which enables us to undertake this huge task.

I would like to thank to the Ag Executive Director, UBOS and her entire technical team for their valuable support in bringing out the final stage of the updated priority gender equality indicators.

**Dr Maxime Houinato**  
**Country Representative**  
**UN Women**

## Preface

---

**T**he principle of ‘leaving no one behind’ of the Sustainable Development Agenda 2030 underscores inclusiveness of all humans in service delivery across all sectors. Thus, gender responsive statistics are necessary for measuring progress towards attaining equity and equality in planning and decision making processes of government and other organisations.

The Uganda Bureau of Statistics (UBOS) as the agency responsible for coordinating the development and maintenance of the National Statistical System (NSS), developed the National Priority Gender Equality Indicators (NPGEIs), in collaboration with Ministries, Departments and Agencies (MDAs). The NPGEIs are intended to guide development and production of gender responsive indicators in the country. The National Priority Gender Equality Indicators (NPGEIs) are anchored on the Plan for National Development Plan (NDP II) and the Sustainable Development Goals (SDGs).

The first set of NPGEIs framework presents indicators for six (6) Thematic Areas namely: Economic, Health, Education, Leadership and Governance, Human Rights, Information and Communication Technology, Energy, Water and Environment, Agriculture and Indices. The Uganda Bureau of Statistics is committed to ensure alignment and production of gender responsive statistics to help us track the progress of attainment of Goal 5 and other SDG targets.

After two years of implementation, the Uganda Bureau of Statistics undertook updating of the NPGEIs with the aim of aligning them to the Government of Uganda Sectors and the National Standard Indicator (NSI) Framework.

I would like to appreciate the contribution of UN Women, and the Department for International Development (DFID) that supported the NPGEI updating process.

I wish to extend special appreciation to all the stakeholders who contributed to the updating of the National Priority Gender Equality Indicators (NPGEIs). These include the Gender Statistics Advisory Group, the UBOS Gender Statistics Committee, the Coordinating Team at UBOS, respondents to the Sector consultations, participants at the Validation Meeting and Dissemination Workshop; and the Consultant who provided the secretariat to the updating exercise.

I, therefore, encourage and appeal to key stakeholders to make use of this valuable information.

**Imelda Atai Musana**

**Ag EXECUTIVE DIRECTOR**

# 1. Introduction

---

## 1.1 Background

Uganda's long-term vision is enshrined in the Vision 2040 objective which is 'a transformed Ugandan society from a peasant to a modern and prosperous country within 30 years'. The Uganda Vision 2040 is implemented through medium-term National Development Plans. The current plan, the second National Development Plan (NDP II) covering the period 2015/16 – 2019/20 underlines affirmative action and the need for gender equality and equity in national planning and transformation that constrain development in society.

The Constitution of the Republic of Uganda prohibits all forms of discrimination and provides for the protection and promotion of women's rights. The National Gender Policy (2007) and the National Action Plan on Women (2007) inform gender mainstreaming and coordination across sectors. Other laws promoting gender equality and women's rights include; the Domestic Violence Act (2010) and the Prohibition of Female Genital Mutilation Act (2010).

Over the past three decades, the country has made significant progress in poverty reduction, the expansion of educational opportunities for young people, and, formulation of gender responsive policies and strategies. These have enhanced the gender equality and empowerment of women and girls. However, empirical evidence shows that gender inequality still exists.

- The Uganda Household Survey (2012/13) revealed that; the average household income was higher among male-headed households (UGX 243,000) than female-headed households (UGX 176,000).
- The National Labour Force Survey (2016/17) also revealed higher labour underutilization among females (39.0 percent) in the working age population compared to the males (31.5 percent) and the Median monthly wages were lower for the employed females in the informal sector (150,000) than males (240,000).

Uganda adopted the Agenda 2030 Sustainable Development Goals (SDGs) and the National Development Plan II was aligned to these goals. Specifically, SDG 5 targets and indicators on achieving gender equality and empowerment of all women and girls has been fully integrated in government planning. Government is committed to this collective journey through the transformative agenda 2030 and pledges to leave no one behind. This path requires that critical gender inequalities are illuminated, the relevant data and statistics generated and inequalities acted upon in a systematic manner.

Thus, there is a need for quality statistics to highlight the concerns, needs and challenges of women, men, girls and boys. These will inform policy design, planning and implementation of the relevant programmes to realise improvement in gender equality and empowerment outcomes. Therefore, the development of the National Priority Gender Equality Indicators (NPGEIs) was a timely effort to track progress and explore the gaps on gender inequality for redress by the respective sectors.

## 1.2 The National Priority Gender Equality Indicators (NPGEIs)

The National Priority Gender Equality Indicators (NPGEIs) indicators are of critical importance in determining whether policy efforts are consolidated, goals and targets are achieved or missed. Building integrated information systems that address gender equality in all its dimensions will provide a credible evidence base that can inform such policies, support advocacy and promote accountability. Uganda will be measured based on what would have been accomplished over the 15 years in realizing the ambition of empowered women and girls. The NPGEIs are also critical for putting the spotlight on inequality and underscoring the need to realize the rights of poor and marginalized women and girls who are left behind and whose rights are not always prioritized in policy-making processes.

In order to meet the objective of closely and systematically monitoring the progress of gender equality in Uganda, the Uganda Bureau of Statistics (UBOS) along with the respective sectors developed a set of 106 priority NPGEIs. The NPGEIs were developed in a participatory and consultative process. The actors involved included senior government officials in the categories of policy analysts, planners, gender experts, statisticians, academicians, and Civil Society. The first set of NPGEIs was integrated into the National Standard Indicators (NSI) framework and aligned to global commitments towards monitoring gender equality. In 2016, the NPGEIs were adopted by the Government of Uganda in a high level meeting of Permanent Secretaries and senior officials from different Ministries, Departments and Agencies (MDAs), development partners, Civil Society Organization and the academia.

### 1.2.1 Tiers of the indicators

Monitoring progress of the NDP II and SDGs is guided by the three tier criteria defined by the UN Inter Agency Experts Group (IAEG) of the global indicator framework. The criterion categorizes the tiers based on the availability of data and methodology as follows;

- Tier I** Indicators which have available methodology and sex disaggregated data.
- Tier II** Indicators which do not have disaggregated data by any source.
- Tier III** Indicators which neither have proper methodology in neither place nor data.

### 1.2.2 The baseline and 2020 targets

The base year for the NPGEIs was set for the year 2015 (to coincide with the beginning of the NDP II). However, in cases where data for 2015 were not available, the latest available data was considered as the baseline information. The targets were based on the NDP II terminal year, which is 2020. The targets were set either from the NDP II or from the SDGs, as using the following criteria;

1. If the NPGEIs were similar to the NDP II indicator, the NDP II target was adopted.
2. Where the NPGEIs were not similar to the NDP II indicator but similar to SDGs, the target was set based on one-third of the SDG target (2020).

### 1.2.3 Reprocessing of the NPGEIs

In 2017-2018, the Uganda Bureau of Statistics (UBOS) undertook a reprocessing of the NPGEIs for indicators in Tier I. The reprocessing was aimed at generating indicators disaggregated by sex, age, residence, income status, and geographical location. A total of 46 out of the 106 NPGEIs were successfully reprocessed and a report published in 2018. Consultations with the data producers indicated that another 62 indicators can be reprocessed from existing data sources.

### 1.2.4 Updating of the NPGEIs

In 2018, UBOS initiated a process of updating the NPGEIs. Table 1 presents the list of the updated NPGEIs while detailed information about the NPGEIs is presented in the matrices in Sections 2 and Section 3. Section 2 presents the indicators in Tiers I and II, while Section 3 presents the indicators in Tier III.

**Table 1: NPGEIs by Sector**

Sector	NPGEIs
<b>Accountability Sector</b>	1.1: Income per capita 1.2: Household expenditure by sex of head 1.3: Average household income by sex of head 1.4: Average household agricultural income by sex of head 1.5: Proportion of the population living below the national poverty line by sex 1.6: Proportion of the population living below the international poverty line (less than USD 1.25 per day) by sex. 1.7: Proportion of the population with access to financial services by sex.
<b>Agriculture Sector</b>	2.1: Proportion of the agricultural population owning agricultural land by sex of owner. 2.2: Proportion of women owning agricultural land 2.3: Proportion of the agricultural population with user-rights by sex. 2.4: Proportion of the agricultural population who make decisions by sex of decision maker 2.5: Proportion of the agricultural population who decide on proceeds of agriculture by sex of decision maker. 2.6: Proportion of the agricultural population who decide what to plant by sex of decision maker. 2.7: Proportion of the agricultural population who decide what inputs to use by sex of decision maker. 2.8: Proportion of farmers using labour saving technologies by sex.
<b>Education Sector</b>	3.1: Gross Pre-primary enrolment ratio by sex. 3.2: Net Pre-primary enrolment ratio by sex. 3.3: Gross Primary School enrolment rate by sex 3.4: Net Primary School enrolment rate by sex 3.5: Gross Secondary School enrolment rate by sex. 3.6: Net Secondary School enrolment rate by sex 3.7: Gender parity index in school enrolment 3.8: Primary (P7) Completion rate by sex 3.9: Transition rate to Secondary (S1) by sex 3.10: S4 Completion rate by sex 3.11: Transition rate from S4 to S5 by sex 3.12: Literacy rate by sex 3.13: Literacy rate at P3 by sex 3.14: Literacy rate at P6 by sex 3.15: Numeracy rate at P3 by sex 3.16: Numeracy rate at P6 by sex 3.17: Pass rate by sex 3.18: Pass rate in English by sex 3.19: Pass rate in Mathematics by sex 3.20: Average time taken (Minutes) to school (for day scholars) by sex. 3.21: Proportion of schools with separate stances for females and males 3.22: Pupil/student Stance Ratio by Sex 3.23: BTVET enrolment by sex 3.24: University enrolment by sex 3.25: Tertiary enrolment by sex 3.26: Proportion of females among tertiary education teachers or professors 3.27: Average (Mean) years of schooling of the population aged 25 years and older by sex 3.28: Educational Attainment of the population aged 25 years and older by sex 3.29: School Drop-out rate by sex

Sector	NPGEIs
Energy and Mineral Development Sector	4.1: Proportion of the population with primary reliance on non-solid fuels by sex of household head.
Health Sector	<p>5.1: Proportion of children who are exclusively breastfed for six months</p> <p>5.2: Prevalence of stunting in children under 5 years of age by sex</p> <p>5.3: Prevalence of wasting in children under 5 years of age by sex</p> <p>5.4: Prevalence of under-weight children under 5 years of age by sex</p> <p>5.5: Prevalence of anaemia among women of reproductive age</p> <p>5.6: Infant Mortality rate per 1,000 live births by sex</p> <p>5.7: Under five mortality rate per 1,000 live births by sex</p> <p>5.8: Maternal Mortality Ratio</p> <p>5.9: Proportion of births attended by skilled health personnel</p> <p>5.10: Proportion of births that are high risk</p> <p>5.11: Proportion of women attending at least four Antenatal care visits</p> <p>5.12: Proportion of women attending first ANC in the first trimester</p> <p>5.13: Total Fertility Rate</p> <p>5.14: Adolescent Birth Rate (15-19 years) per 1,000 women in that age group.</p> <p>5.15: Teenage Childbearing</p> <p>5.16: Contraceptive Prevalence Rate</p> <p>5.17: Adolescent Contraceptive Prevalence Rate</p> <p>5.18: Life Expectancy at birth by sex.</p> <p>5.19: Adult mortality by cause and age groups</p> <p>5.20: Proportion of the population living with HIV/AIDS by age and sex.</p> <p>5.21: HIV/AIDS prevalence among pregnant women.</p> <p>5.22: Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations.</p> <p>5.23: Proportion of HIV/AIDS pregnant women enrolled on EMTCT (Elimination of Mother to Child Transmission)</p> <p>5.24: Proportion of eligible persons receiving ARVs by sex.</p> <p>5.25: Proportion of HIV positive adolescents accessing ARVs by sex.</p> <p>5.26: Prevalence of lower respiratory infections by Sex.</p> <p>5.27: Prevalence of lower respiratory infections in children under 5 years by sex.</p> <p>5.28: Smoking prevalence among persons aged 15 and over, by sex</p> <p>5.29: Proportion of adults who are obese, by sex.</p> <p>5.30: Proportion of the population with Health Insurance by sex.</p> <p>5.31: Proportion of the population living within a radius of 5 km from a health facility.</p> <p>5.32: Average time taken (Minutes) travelling to the health facility by sex</p> <p>5.33: Ratio of practicing medical officers (doctors) to population</p> <p>5.34: Ratio of practicing nurses to population.</p> <p>5.35: Ratio of practicing midwives to women</p> <p>5.36: Ratio of practicing Anaesthetical Officers to population</p> <p>5.37: Ratio of practicing Anaesthetical Officers to women</p>

Sector	NPGEIs
<b>ICT and National Guidance</b>	6.1: Proportion of individuals who own mobile phones individually by sex. 6.2: Proportion of individuals who own mobile phones jointly by sex. 6.3: Proportion of individuals using mobile phones by sex. 6.4: Proportion of households that own a Television by sex of head 6.5: Proportion of individuals using the internet by sex. 6.6: Proportion of the population with access to mass media (Radio or TV or Newspaper) by sex of household head 6.7: Proportion of individuals using social media by sex
<b>Justice, Law and Order Sector</b>	7.1: Crime Victimization Rate by sex. 7.2: Proportion of child related crime 7.3: Proportion of police officers who are female 7.4: Proportion of judges who are female
<b>Lands and Housing Sector</b>	8.1: Proportion of the population owning land individually by sex of owner. 8.2: Proportion of the population owning land jointly by sex of owner. 8.3: Proportion of the population owning houses
<b>Public Sector Management Sector</b>	9.1: Percentage of MDAs and LGs with policies, plans and budgets that promote gender equity and equality 9.2: Proportion of institutions with systems to track and make public allocation for gender equality and women's empowerment 9.3: Proportion of government recurrent and capital spending going to sectors that disproportionately benefit women, the poor and vulnerable groups
<b>Science, Technology and Innovation Sector</b>	10.1: Ratio of graduates in Science & Technology to Arts by sex 10.2: Proportion of females among science, engineering, manufacturing and construction graduates at tertiary level by sex. 10.3: Proportion of engineering graduates by sex 10.4: Proportion of science graduate teachers by sex 10.5: Proportion of Medical officers, clinical officers and allied and dental practitioners by sex

Sector	NPGEIs
<b>Social Development Sector</b>	<p>11.1: Average wage earnings in formal employment by sex.</p> <p>11.2: Average wage earnings in informal employment by sex.</p> <p>11.3: Youth unemployment rate by sex.</p> <p>11.4: Proportion of Young People (15 – 30 years) who are NEET<sup>1</sup> by age and sex.</p> <p>11.5: Proportion of children aged 5 – 17 years engaged in child labour by sex.</p> <p>11.6: Proportion of the working age population employed by sex.</p> <p>11.7: Employment rate of persons aged 25-49 (with a child under age 3 living in a household and with no children living in the household), by sex</p> <p>11.8: Vulnerability employment rate</p> <p>11.9: Proportion of the employed persons who are Own-account workers by sex.</p> <p>11.10: Proportion of the employed persons who are employers by sex.</p> <p>11.11: Proportion of the employed persons who are contributing family members by sex.</p> <p>11.12: Proportion of the employed population in the agriculture sector by sex.</p> <p>11.13: Proportion of the employed population employed in the manufacturing sector by sex.</p> <p>11.14: Proportion of the employed population employed in the services sector by sex.</p> <p>11.15: Proportion of the employed persons working part-time, by sex</p> <p>11.16: Informal employment as a proportion of total non-agricultural employment, by sex.</p> <p>11.17: Proportion of firms owned by women, by size.</p> <p>11.18: Average number of hours a week spent on unpaid domestic and care work by sex</p> <p>11.19: Average time taken (Minutes) to &amp; fro the firewood supply point by sex of household head.</p> <p>11.20: Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care.</p> <p>11.21: Proportion of seats held by women in national Parliament</p> <p>11.22: Proportion of seats held by women in Local Governments.</p> <p>11.23: Proportion of women in managerial positions in the formal sector.</p> <p>11.24: Proportion of the ever-partnered population aged 15+ subjected to physical, sexual or psychological violence by a current or former intimate partner, in the last 12 months by sex.</p> <p>11.25: Proportion of the population aged 15 years and older subjected to sexual violence by persons other than an intimate partner, in the previous 12 months, by age and sex,</p> <p>11.26: Proportion of the population aged 20-24 and 25-29 years who experienced sexual violence by age 18 by sex</p> <p>11.27: Proportion of the population aged 20-24 who were married or in a union before age 18 by sex.</p> <p>11.28: Proportion of girls and women aged 5 years and above who have undergone FGM/C</p> <p>11.29: Proportion of PWDs with access to essential services and infrastructure by sex</p> <p>11.30: Uganda Gender Gap Index.</p> <p>11.31: Uganda Gender Development Index.</p> <p>11.32: Uganda Social Institutions and Gender Index</p>
<b>Water and Environment Sector</b>	<p>12.1: Proportion of households with access to improved water source</p> <p>12.2: Average time taken (Minutes) to &amp; fro the water (safe) supply point by sex of household head.</p> <p>12.3: Average waiting time (Minutes) at the water (safe) supply point by sex of head.</p> <p>12.4: Proportion of households with access to improved sanitation by residence</p>

### 1.2.5 Updating the metadata

The metadata for all the proposed indicators were updated using three sources as listed below:

1. Indicators that are similar to those in the National Standard Indicator (NSI) Framework, the NSI metadata was adopted.
2. Indicators not in the NSI Framework, the National Statistical Metadata Dictionary was used.
3. Indicators neither in the NSI nor in the National Metadata Dictionary, the definition from the data source was used.

### 1.2.6 Updating of the data matrix

The baseline information for the NPGEIs was set for the year 2015 or the latest available information before that. More censuses/surveys data as well as those from administrative records have become available since then. These include:

1. The 2014 National Population and Housing Census;
2. The 2016 Uganda Demographic and Health Survey;
3. The Uganda Population based HIV Impact Assessment Survey (UPHIA) 2016-2017;
4. The Uganda National Household Survey (UNHS) 2016/17;
5. The National Labour Force Survey (NLFS) 2016/17;

The information for the indicators was updated with the most recent available data. In the event that an indicator could be obtained from multiple sources of data, it was decided that for purposes of comparability over time, one source is used consistently. The choice of which source to use was based on the criteria below:

1. Where a survey was undertaken with the objective of compiling the type of information or indicator, then data from such a survey would take precedence over any other source. For instance, the broad goal of the Uganda Demographic and Health Surveys (UDHS) is 'to provide policy makers in the Ministry of Health and other organizations with information to plan future interventions effectively, especially in its health sector'. Therefore the UDHS took precedence over any other survey when updating the health indicators;
2. Where an indicator can be obtained from multiple sources but not designed specifically to collect that indicator, the survey considered to be more robust methodologically would take precedence. Possible criteria for robustness include:
  - a. Regularity of production of an indicator to allow for continuous monitoring of trends;
  - b. A larger sample size that allows for more disaggregation into different sub-populations.

Using the above criteria and data sources, the indicator data points were updated to 2016/17. In the case of information compiled by Calendar year not Financial year, the information for the year 2017 was preferred unless not available.

The indicators with their data points updated are presented in the NPGEIs matrix in Section 2, while Section 3 has the NPGEI matrix with indicators whose data have not been updated. Another eight (8) indicators remained in Tier III (requiring methodology to be developed) and these are presented in NPGEIs Matrix in Section 4. The categorization of the indicators is summarised in Table 1.1.

**Table 1.1: NPGEIs by Sector and status of data updating**

Sector	Data updating status			
	Data updated	Data not updated	Require methodology	Total
Accountability	5	2		7
Agriculture	0	8		8
Education	17	11	1	29
Energy and Mineral Development	0	1		1
Health	25	11	1	37
ICT and National Guidance	5	1	1	7
Justice, Law and Order	0	4		4
Lands and Housing	1	2		3
Public Sector Management	0	0	3	3
Science, Technology and Innovation	0	5		5
Social Development	23	7	2	32
Water and Environment	4	0		4
<b>All Sectors</b>	<b>80</b>	<b>52</b>	<b>8</b>	<b>140</b>

### 1.3 Conclusion

The NPGEIs is an essential tool for monitoring progress towards achieving the targets under SDGs in general and Goal 5 in particular, as well as other national and international policy and planning frameworks aimed at achieving gender equality in Uganda. Implementation of the NPGEIs will result into considerable gains and opportunities for production and utilization of quality gender responsive statistics, as part of the overall strategy to illuminate the path towards sustainable development.

## 2. NPGEIs in Tier I by Sector

### 2.1 Accountability Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI <sup>2</sup>	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
1.1	1.1: Income per capita (Proxy; GDP per capita in constant 2009/10 Prices)	NSI Level 1 a: Gross National Income (USD) per Capita SDG Target 10.1.1: Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population	UNHS (UBOS)	759	774	1,039	I
1.2	1.2: Household expenditure by sex of head	SDG Target 10.1.1: Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population	UNHS (UBOS)	Total: 244,400	Total: 341,900		I
1.3	1.3: Average household income by sex of head	SDG Target 10.1.1: Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population	UNHS (UBOS)	Female: 176,000 Male: 243,000 Total: 223,000	Total: 416,000		I

## 2.12 Water and Environment Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
12.1	12.1: Proportion of households with access to improved water source	NSI Level 1: Safe water coverage SDG Target 6.1:	UNHS (UBOS)		UDHS 2016 Rural: 91.3 Urban: 73.8 Total: 78.3		I
12.2	12.2: Average time taken (Minutes) to & fro the water (safe) supply point by sex of household head.	SDG Target 5.4.1: Proportion of time spent on unpaid domestic and care work, by sex, age and location	UNHS (UBOS)	Female: 29.8 Male: 29.6 Total: 29.8	Female: 24 Male: 24 Total: 24		I
12.3	12.3: Average waiting time (Minutes) at the water (safe) supply point by sex of head.	SDG Target 5.4.1: Proportion of time spent on unpaid domestic and care work, by sex, age and location	UNHS (UBOS)	Female: 27.2 Male: 28.0 Total: 27.4	Female: 23 Male: 23 Total: 23		I
12.4	12.4: Proportion of households with access to improved sanitation by residence	NSI Level 2: Household Latrine Coverage SDG Target 6.2:	UNHS (UBOS)		UDHS 2016 Rural: 26.5 Urban: 16.0 Total: 18.7		I

## 3. NPGEIs in Tier II by Sector

### 3.1 Accountability Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
1.4	1.4: Average household agricultural income by sex of head	<b>SDG Target 10.1.1:</b> Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population	UNPS				II
1.6	1.6: Proportion of the population living below the international poverty line (less than USD 1.25 per day) by sex.	<b>SDG Target 1.1.1:</b> Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)	UNHS (UBOS)				II

### 3.2 Agriculture Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
2.1	2.1: Proportion of the agricultural population owning agricultural land by sex of owner.	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex.	UNPS				II
2.2	2.2: Proportion of women owning agricultural land	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex.	UNPS				II
2.3	2.3: Proportion of the agricultural population with user-rights by sex.		UNPS				II
2.4	2.4: Proportion of the agricultural population who make decisions by sex of decision maker		UNPS				II

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
2.5	2.5: Proportion of the agricultural population who decide on proceeds of agriculture by sex of decision maker.	<b>SDG Target 5.a.1 (b):</b> Share of women among owners or rights bearers of agricultural land, by type of tenure	UNPS				II
2.6	2.6: Proportion of the agricultural population who decide what to plant by sex of decision maker.	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex.	UNPS				II
2.7	2.7: Proportion of the agricultural population who decide what inputs to use by sex of decision maker.	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex.	UNPS				II
2.8	2.8: Proportion of farmers using labour saving technologies by sex.		UCAAL				II

### 3.3 Education Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2017)	NDP II Target (2020)	Tier
3.13	3.13: Literacy rate at P3 by sex	<b>NDP II:</b> Literacy rate at P3 by sex <b>SDG Target 4.1.1:</b> <b>SDG Target 4.6.1:</b> <sup>9</sup>	MOES (NAPE Report)	Girls: 61.3 Boys: 59.0 Total: 60.2		Girls: 70 Boys: 70 Total: 70	II
3.14	3.14: Literacy rate at P6 by sex	<b>NDP II:</b> Literacy rate at P6 by sex <b>SDG Target 4.1.1:</b> <b>SDG Target 4.6.1:</b>	MOES (NAPE Report)	Girls: 52.2 Boys: 51.6 Total: 51.9		Girls: 50 Boys: 50 Total: 50	II

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2017)	NDP II Target (2020)	Tier
3.15	3.15: Numeracy rate at P3 by sex	NDP II: Numeracy rate at P3 by sex <b>SDG Target 4.1.1:</b> <b>SDG Target 4.6.1:</b>	MOES (NAPE Report)	Girls: 70.6 Boys: 73.0 Total: 71.7		Girls: 80 Boys: 80 Total: 80	II
3.16	3.16: Numeracy rate at P6 by sex	NDP II: Numeracy rate at P6 by sex <b>SDG Target 4.1.1:</b> <b>SDG Target 4.6.1:</b>	MOES (NAPE Report)	Girls: 48.2 Boys: 56.9 Total: 52.6		Girls: 50 Boys: 50 Total: 50	II
3.18	3.18: Pass rate in English by sex		Education Fact Sheet (MOES)	Girls: 91.8 Boys: 89.9		Girls: 94.8 Boys: 92.8	II
3.19	3.19: Pass rate in Mathematics by sex		Education Fact Sheet (MOES)	Girls: 77.5 Boys: 81.7		Girls: 80.8 Boys: 84.7	II
3.20	3.20: Average time taken (Minutes) to school (for day scholars) by sex.	<b>SDG Target 5.4.1:</b> Proportion of time spent on unpaid domestic and care work, by sex, age and location	UNHS (UBOS)	Female: 37.3 Male: 35.2 Total: 36.7			II
3.21	3.21: Proportion of schools with separate stances for females and males		NSDS (UBOS)	Primary : 97.3 Secondary: 98.8			II
3.22	3.22: Pupil/student Stance Ratio by Sex		NSDS (UBOS)	Primary Girls: 69 Boys: 71 Secondary Girls: 49 Boys: 61			II
3.26	3.26: Proportion of females among tertiary education teachers or professors	<b>UN-MSGI 26:</b> Proportion of females among tertiary education teachers or professors	Census of Higher Educational Institutions (MOES)				II

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2017)	NDP II Target (2020)	Tier
3.28	3.28: Educational Attainment of the population aged 25 years and older by sex	UN-MSGI 31: Educational attainment of the population aged 25 and older, by sex	UNHS (UBOS)	<u>Females</u> None: 24.7 Primary: 53.7 Secondary: 18.4 Post sec: 3.2 <u>Males</u> None: 10.2 Primary: 60.0 Secondary: 24.2 Post sec: 5.6	<u>Females 15+</u> None: 16.2 Primary: 51.2 Secondary: 25.7 Post sec: 6.9 <u>Males 15+</u> None: 6.9 Primary: 52.9 Secondary: 29.1 Post sec: 11.1		II

### 3.4 Energy and Mineral Development Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
4.1	4.1: Proportion of the population with primary reliance on non-solid fuels by sex of household head.	SDG Target: 7.1.2 Proportion of population with primary reliance on clean fuels and technology	UDHS (UBOS)	0.6%			II

### 3.5 Health Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
5.19	5.19: Adult mortality by cause and age groups	UN-MSGI 42: Adult mortality by cause and age groups	UDHS (UBOS)				II
5.21	5.21: HIV/AIDS prevalence among pregnant women.	NDP II: HIV - Prevalence rate SDG Target 3.3.1: Number of new HIV infections per 1000 uninfected population, by sex, age and key populations	MoH - AIS/ UPHIA	5.5			II

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
5.23	5.23: Proportion of HIV/AIDS pregnant women enrolled on EMTCT (Elimination of Mother to Child Transmission)		MoH - AIS/UPHIA	79.9		100	II
5.24	5.24: Proportion of eligible persons receiving ARVs by sex.	<b>NDP II:</b> Percentage of eligible persons receiving ARVs <b>UN-MSGI 40:</b> Access to anti-retroviral drug by sex	MoH - AIS/UPHIA	Female: 53 Male: 46		90	II
5.25	5.25: Proportion of HIV positive adolescents accessing ARVs by sex.	<b>NDP II:</b> Percentage of eligible persons receiving ARVs	MoH-HMIS				II
5.32	5.32: Average time taken ( <i>Minutes</i> ) traveling to the health facility by sex	<b>SDG Target 5.4.1:</b> Proportion of time spent on unpaid domestic and care work, by sex, age and location	UNHS (UBOS)	Female: 46.0 Male: 49.7 Total: 47.1			II
5.33	5.33: Ratio of practicing medical officers (doctors) to population	<b>NSI Level 2:</b> Ratio of doctors to population <b>NDP II:</b> Ratio of doctors to population <b>SDG Target 3.c.1:</b> Health worker density and distribution.	MoH (DHIS-2)	1: 24,725		1:22,625	II
5.34	5.34: Ratio of practicing nurses to population.	<b>NSI Level 2:</b> Ratio of nurses to population. <b>NDP II:</b> Ratio of nurses to population <b>SDG Target 3.c.1:</b> Health worker density and distribution.	MoH (DHIS-2)	1:11,000		1:8,000	II
5.35	5.35: Ratio of practicing midwives to women	<b>SDG Target 3.c.1:</b> Health worker density and distribution.	MoH (DHIS-2)				II
5.36	5.36: Ratio of practicing Anesthetical Officers to population	<b>SDG Target 3.c.1:</b> Health worker density and distribution.	MoH (DHIS-2)				II
5.37	5.3: Ratio of practicing Anesthetical Officers to women	<b>SDG Target 3.c.1:</b> Health worker density and distribution.	MoH (DHIS-2)	1:11,000		1:9,500	II

### 3.6 ICT and National Guidance Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
6.3	6.3: Proportion of individuals using mobile phones by sex.	<p><b>NDP II:</b> Percentage of mobile line subscriptions</p> <p><b>SDG Target 5.b.1</b></p> <p>Proportion of individuals who own a mobile telephone by sex</p> <p><b>UN-MSGI 18:</b> Proportion of individuals using a mobile cellular telephone, by sex</p>	UNHS (UBOS)				II

### 3.7 Justice, Law and Order Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
7.1	7.1: Crime Victimization Rate by sex.		UBOS				II
7.2	7.2: Proportion of child related crime	<b>NSI Level 3:</b> JLOS Sector	POLICE				II
7.3	7.3: Proportion of police officers who are female	<b>UN-MSGI 46:</b> Percentage of female police officers	POLICE				II
7.4	7.4: Proportion of judges who are female	<b>UN-MSGI 47:</b> Percentage of female judges	Judicial Service Commission				II

### 3.8 Lands and Housing Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
8.1	8.1: Proportion of the population owning land individually by sex of owner.	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex. <b>UN-MSGI 12:</b> Proportion of adult population owning land, by sex	UNHS (UBOS)	Female: 59.1 Male: 42.9 Total: 47.9		Female : 25.46 Male : 36.38	II
8.2	8.2: Proportion of the population owning land jointly by sex of owner.	<b>SDG Target 5.a.1 (a):</b> Proportion of total agricultural population with ownership or secure rights over agricultural land by sex. <b>UN-MSGI 12:</b> Proportion of adult population owning land, by sex	UNHS (UBOS)	Female: 13.1 Male: 36.5 Total: 29.4		Total: 38.15	II

### 3.10 Science, Technology and Innovation Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
10.1	10.1: Ratio of graduates in Science & Technology to Arts by sex	<b>NSI Level 2:</b> Ratio of graduates in science and technology to Arts <b>NDP II:</b> Ratio of graduates in Science & Technology to Arts	UNCST	1:5		3:5	II

<b>NPGEI No</b>	<b>Name of Indicator</b>	<b>Linkage to NSI, NDP II and SDGs and UN-MSGI</b>	<b>Source</b>	<b>Baseline (2015)</b>	<b>Current Status (2016/17)</b>	<b>NDP II Target (2020)</b>	<b>Tier</b>
<b>10.2</b>	<b>10.2:</b> Proportion of females among science, engineering, manufacturing and construction graduates at tertiary level by sex.	<b>NDP II:</b> Ratio of graduates in Science & Technology to Arts	UNCST				II
<b>10.3</b>	<b>10.3:</b> Proportion of engineering graduates by sex	<b>NDP II:</b> Ratio of graduates in Science & Technology to Arts	UNCST				II
<b>10.4</b>	<b>10.4:</b> Proportion of science graduate teachers by sex	<b>NDP II:</b> Ratio of graduates in Science & Technology to Arts	UNCST				II
<b>10.5</b>	<b>10.5:</b> Proportion of Medical officers, clinical officers and allied and dental practitioners by sex	<b>NDP II:</b> Ratio of graduates in Science & Technology to Arts	UNCST				II

### 3.1.1 Social Development Sector

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
11.7	11.7: Employment rate of persons aged 25-49 (with a child under age 3 living in a household and with no children living in the household), by sex	<i>UN-MSGI 15:</i> Employment rate of persons aged 25-49 with a child under age 3 living in a household and with no children living in the household, by sex	ALFS (UBOS)				II
11.17	11.17: Proportion of firms owned by women, by size.	<i>UN-MSGI 7:</i> Percentage of firms owned by women, by size	COBE (UBOS)				II
11.19	11.19: Average time taken (Minutes) to & fro the firewood supply point by sex of household head.	<i>SDG Target 5.4.1:</i> Proportion of time spent on unpaid domestic and care work, by sex, age and location <i>SDG Target 5.5.2</i>	UNHS (UBOS)	Females: 40.9 Males: 40.0 Total: 40.7			II
11.23	11.23: Proportion of women in managerial positions in the formal sector.	Proportion of women in managerial positions <i>UN-MSGI 45:</i> Women's share of managerial positions <i>SDG Target 5.2.1</i>	Ministry of Public Service				II
11.24	11.24: Proportion of the ever-partnered population aged 15+ subjected to physical, sexual or psychological violence by a current or former intimate partner, in the last 12 months by sex.	Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner, in the previous 12 months, by form of violence and age. <i>UN-MSGI 48:</i> Proportion of ever-partnered women (aged 15-49) subjected to physical and/or sexual violence by a current or former intimate partner, in the last 12 months <i>SDG Target 5.2.2</i>	UDHS (UBOS)	<u>15-49 Years</u> Females: 15.4 Males: 2.9		30 (SDG)	II
11.25	11.25: Proportion of the population aged 15 years and older subjected to sexual violence by persons other than an intimate partner, in the previous 12 months, by age and sex	Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence. <i>UN-MSGI 49:</i> Proportion of women (aged 15-49) subjected to sexual violence by persons other than an intimate partner, since age 15	UDHS (UBOS)	<u>15-49 Years</u> Females: 1.1 Males: 6		8 (SDG)	II
11.32	11.32: Uganda Social Institutions and Gender Index		UBOS	0.47			II

## 4. NPGEs in Tier III - that require methodology to be developed

NPGEI No	Name of Indicator	Linkage to NSI, NDP II and SDGs and UN-MSGI	Source	Baseline (2015)	Current Status (2016/17)	NDP II Target (2020)	Tier
3.29	3.29: School Drop-out rate by sex		MOES				III
5.22	5.22: Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations.	NDP II: HIV - Prevalence rate <b>SDG Target 3.3.1:</b> Number of new HIV infections per 1000 uninfected population, by sex, age and key populations	MoH (DHIS-2)			92,191 (among adults)	III
6.7	6.7: Proportion of individuals using social media by sex		UNHS				III
9.1	9.1: Percentage of MDAs and LGs with policies, plans and budgets that promote gender equity and equality	<b>SDG Target 5.1.1</b> Whether or not legal frameworks are in place to promote, enforce and monitor equality and non-discrimination on the basis of sex	EOC, MoFPED; OPM				III
9.2	9.2: Proportion of institutions with systems to track and make public allocation for gender equality and women's empowerment	<b>SDG Target 5.c.1</b> Proportion of countries with systems to track and make public allocations for gender equality and women's empowerment	MoFPED; MGLSD				III
9.3	9.3: Proportion of government recurrent and capital spending going to sectors that disproportionately benefit women, the poor and vulnerable groups	<b>SDG Target 1.b.1</b> Proportion of government recurrent and capital spending to sectors that disproportionately benefit women, the poor and vulnerable groups	MoFPED				III
11.15	11.15: Proportion of the employed persons working part-time, by sex	<b>UN-MSGI 14:</b> Proportion of employed working part-time, by sex	ALFS (UBOS)				III
11.29	11.29: Proportion of PWDs with access to essential services and infrastructure by sex		MGLSD			40 (SDG)	III

# 5. Metadata for the National Priority Gender Equality Indicators (NPGEIs)

## 5.1. Accountability Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.1: Income per capita</b>	This is the measure of the amount of money that is being earned per person in a country. Income per capita can apply to the average per-person income for a country. It is used as a means for evaluating the living conditions and quality of life in different areas <b>Standard classification used and manual followed:</b> System of National Accounts (SNA 2008) International Standard Industrial Classification: (ISIC) Rev.4	UGX	Divide the country's total national income by its total population.  <b><u><math>\frac{GNH\ Income}{N\ Population}</math></u></b>	Data is obtained from household and Panel surveys to derive the indicator.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)  Uganda National Panel Survey (UNPS)	None	UNHS reports  UNPS Reports	Annually  Every 3 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.2:</b> Household expenditure by sex of head	This is an aggregation of all household expenditures i.e. food items, non/ semi-durable goods and durable goods and services per household in a specified period	UGX	Summation of total expenditure per household for the different expenditure categories $\sum HH\ Expenditure$	Household expenditure data is collected using different reference periods for different categories of goods and services. The information is standardized to the same reference period during computation.	Uganda National Household Survey (UNHS)	Sex of household head Residence Age Wealth quintile Region	UNHS Reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	None
<b>1.3:</b> Average household income by sex of head	This is the measure of the average amount of money that is being earned per household in a country in a given period by sex of the household head.	UGX	Divide the country's national income by its total number of households $\frac{\sum HH\ Income}{\sum HHs}$	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda National Household Survey (UNHS)	Sex of household head Residence Age Wealth quintile Region	UNHS reports UNPS Reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually Every 3 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.4:</b> Average household agricultural income by sex of head	This is the measure of the average amount of money that is being earned from agriculture per household in a country by sex of the household head.	UGX	Divide the country's agricultural income by its total number of households  $\frac{\Sigma Agric Income}{\Sigma HHs}$	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)	Sex of household head Residence Age Wealth quintile	UNPS reports	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.5:</b> Proportion of the population living below the national poverty line by sex	<p>This is the percentage of the population estimated to be living in households with real private consumption per adult equivalent below the poverty line.</p> <p>Poverty line is a monetary measure determined at a given point in time meeting a minimum selection of basic needs.</p> <p><i>The monetary measure is 1USD \$ / 1.25USD 4</i></p>	Percent	<p>Total No. of HH below the Poverty line divided by the total No. of HH multiplied by 100</p> <p><b><u><math>\frac{\Sigma Pop\ in\ poor\ HHs}{\Sigma Population}</math></u></b></p> <p><i>Computed based on the method of Ravallion and Bidani (1994).</i></p>	Household consumption expenditure data is aggregated and adjusted for price changes using CPI data. ( <i>real private consumption</i> )	<p>Uganda National Household Survey (UNHS)</p> <p>Consumer price index (CPI) data</p>	<p>Sex of household head</p> <p>Residence</p> <p>Age</p> <p>Wealth quintile</p> <p>Employment Status</p> <p>Main source of livelihood</p>	<p>UNHS Reports</p> <p>UBOS Annual Statistical Abstract</p> <p>UBOS Website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	Every 3 years	The poverty figure is based on consumption expenditure data.

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.6:</b> Proportion of the population living below the international poverty line (less than USD 1.25 per day) by sex <sup>10</sup>	<p>The international poverty line is a monetary threshold under which an individual is considered to be living in poverty.</p> <p><b>Standard and manual followed:</b> The international poverty line is a monetary threshold under which an individual is considered to be living in poverty.</p>	Percent	<p>Summation over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line divided by the poverty line.</p> <p><b><u><math>\frac{\sum Pop \text{ in poor HHs}}{\sum Population}</math></u></b></p>	<p>Household expenditure data is aggregated and adjusted for price changes using CPI data. (<i>Real private consumption</i>).</p> <p>All household members are converted to the adult equivalent basing on their calorific intake.</p> <p>Aggregation is done based on a standard reference period.</p>	<p>Uganda National Household Survey (UNHS)</p>	<p>Sex of household head</p> <p>Residence</p> <p>Age</p> <p>Wealth quintile</p> <p>Employment Status</p> <p>Main source of livelihood</p>	<p>UNHS Reports</p> <p>UBOS Annual Statistical Abstract</p> <p>UBOS Website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	<p>Every 3 years</p>	<p>Distribution of consumption among the poor is not considered</p> <p>Currently, the international Poverty line is set at USD 1.90</p>

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>1.7:</b> Proportion of the population with access to financial services by sex.	This is the percentage of adult population in the country who have access to defined financial services by sex. Financial services include savings, credit, insurance and digital payment services	Percent	Divide the adult population with access to financial services by the total adult population	Data is obtained from household and Panel surveys to derive the indicator.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Age	UNHS reports  UNPS Reports	Annually Every 3 years	None

## 5.2. Agriculture Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>2.1:</b> Proportion of the agricultural population owning agricultural land by sex of owner.	This is the percentage of agricultural population in the country who own land used for agriculture by sex of the land owner  This emphasizes the importance to monitor ownership/secure rights of the women whose main source of livelihood is farm-based, that is, crop, livestock or forestry The percentage of women (with documented evidence of) owning land used for crop farming, livestock or forestry activities.	Percent	The agricultural population who own land used for agriculture in the country divided by the total agricultural population expressed as a percentage	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)  Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Sex Age Region Mode of ownership (individual or joint)	UNPS reports  UCAAL reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually   Every 10 years	None
<b>2.2:</b> Proportion of women owning agricultural land	This emphasizes the importance to monitor ownership/secure rights of the women whose main source of livelihood is farm-based, that is, crop, livestock or forestry	Percent	The number of women with documented evidence of secure tenure rights to individually or communally held land divided by the female agricultural population expressed as a percentage	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)  Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Region  Land Tenure systems 1. Mailo Land 2. Freehold 3. Leasehold 4. Customary land 5. Public Land	UNPS reports  UCAAL reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  Every ten years	None
<b>2.3:</b> Proportion of the agricultural population with user-rights by sex.		Percent							

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>2.4:</b> Proportion of the agricultural population who make decisions by sex of decision maker		Percent							
<b>2.5:</b> Proportion of the agricultural population who decide on proceeds of agriculture by sex of decision maker.	This refers to the proportion of the agricultural population with the right to decide on proceeds of agriculture by sex.  Proceeds refer to agricultural earnings received from land under cultivation (own or hired or any type of right)	Percent	Total agricultural population who decide on proceeds of agriculture divided by the Total agricultural population expressed as a percentage	Information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)  Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Sex of Decision maker  Region	UNPS reports  UCAAL reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  Every ten years	<b>None</b>
<b>2.6:</b> Proportion of the agricultural population who decide what to plant by sex of decision maker.	This refers to the proportion of the agricultural population with the right to decide on what to plant on land under cultivation (own or hired or any type of right) on the land by sex of the decision maker	Percent	Total agricultural population who decide what to plant to use divided by the total agricultural population expressed as a percentage	Information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)  Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Sex of Decision maker  Region	UNPS reports  UCAAL reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  Every ten years	<b>None</b>

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>2.7:</b> Proportion of the agricultural population who decide what inputs to use by sex of decision maker.	This refers to the proportion of the agricultural population with the right to decide on what inputs to use on the land by sex of the decision maker	Percent	Total agricultural population who decide what inputs to use divided by the total agricultural population expressed as a percentage	Information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Panel Survey (UNPS)  Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Sex of Decision maker  Region	UNPS reports  UCAAL reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  Every ten years	<b>None</b>
<b>2.8:</b> Proportion of farmers using labour saving technologies by sex.	This is the percentage of farmers (agricultural population) using Labour saving technologies by sex <sup>11</sup> .	Percent	The total number of farmers using Labour saving technologies in the country divided by the total farmers expressed as a percentage	Information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Census of Agriculture, Aquaculture and Livestock (UCAAL)	Sex  Age  Region	UCAAL reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	10 Years	<b>None</b>

## 5.3. Education Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.1: Gross</b> Pre-primary enrolment ratio by sex.	This is the total enrolment in a Pre-primary school by sex regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (3 – 5 years) in a given school-year.	Ratio	Number of pupils/ students enrolled in Pre-primary level of education regardless of age divide by the population of the age-group which officially corresponds to the given level of education (3 – 5 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year <sup>12</sup> . The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.	Sex Residence Age Region and District Level of education Ownership Government and Non-Government (Private and community)	Education Fact sheet MOES Statistical Abstract MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.2: Net Pre-primary enrolment ratio by sex.</b>	This is the total enrolment of children aged 3 – 5 years in a Pre-primary school by sex, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (3 – 5 years) in a given school-year.  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Ratio	Number of pupils aged 3 – 5 years enrolled in Pre-primary level of education divided by the population of the age-group which officially corresponds to the given level of education (3 – 5 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year.  The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Sex  Residence  Age  Region and District  Level of education  Ownership Government and Non-Government (Private and community)	Education Fact sheet  MOES Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.3:</b> Gross Primary School enrolment rate by sex	This is the total enrolment in a Primary school by sex regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (6 – 12 years) in a given school-year.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Ratio	Number of pupils enrolled in primary school regardless of age divide by the population of the age-group which officially corresponds to the given level of education (6 – 12 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year.  The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Sex  Residence  Age  Region and District  Level of education  Ownership Government and Non-Government (Private and community)	Education Fact sheet  MOES Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.4: Net Primary School enrolment rate by sex</b>	This is the total enrolment of children aged 6 - 12 years in a Primary school by sex, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (6 – 12 years) in a given school-year.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Ratio	Number of pupils aged 6 – 12 years enrolled in Primary school divided by the population of the age-group which officially corresponds to the given level of education (6 – 12 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year.  The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Sex  Residence  Age  Region and District  Level of education  Ownership Government and Non-Government (Private and community)	Education Fact sheet  MOES Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.5: Gross Secondary School enrolment rate by sex.</b>	This is the total enrolment in a Secondary school by sex regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (13 - 18 years) in a given school-year.  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Ratio	Number of students enrolled in Secondary school regardless of age divide by the population of the age-group which officially corresponds to the given level of education (13 - 18 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year.  The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Sex  Residence  Age  Region and District  Level of education  Ownership Government and Non-Government (Private and community)	Education Fact sheet  MOES Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.6: Net Secondary School enrolment rate by sex</b>	This is the total enrolment of persons aged 13 - 18 years in a Secondary school by sex, expressed as a percentage of the eligible official school-age population corresponding to the same level of education (13 - 18 years) in a given school-year.	Ratio	Number of students aged 13 - 18 years enrolled in Secondary school divided by the population of the age-group which officially corresponds to the given level of education (13 - 18 years) expressed as a percentage	The numerator is obtained from the Annual School Census undertaken every year.  The denominator is obtained from the annual population projections by UBOS.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Sex  Residence  Age  Region and District  Level of education	Education Fact sheet  MOES Statistical Abstract	Annually	None
	<b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011					Ownership Government and Non-Government (Private and community)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )		

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.7: Gender parity index in enrolment</b>	This is a socio-economic index designed to measure the relative access to education of males and females.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Ratio	Divide the female value of a given enrolment indicator by the male value of the same indicator for a given level of education (Primary, secondary, tertiary etc.).	The information is obtained from the Annual School Census undertaken every year and the annual population projections by UBOS.  Reports are generated by OLAP cubes (online software) from where enrolment figures and the Gender Parity Index determined.	Information on enrolment is from the Annual School Census (ASC) undertaken every fiscal year.  Population projections are from UBOS and are updated annually	Region and District  Residence  Level of education (primary, secondary and tertiary levels)  Ownership Government and Non-Government (Private and community)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet	Annually	None
<b>3.8: Primary (P7) Completion rate by sex</b>	This is the total number of pupils (candidates) who registered for the end of primary exams (PLE) regardless of age, expressed as a percentage of the population at the official primary graduation age (12 years).  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Percent	The number of registered candidates for P7 divided by the 12 year old population, and expressed as a percentage.	Data on candidates' final grade examinations is obtained from the administrative registers of the Uganda National Examinations Board (UNEb) and analyzed to derive the number of sitting candidates who pass examinations.  Population projections are from UBOS and are updated annually.	Administrative data from UNEb  UBOS Annual Population projections	Sex  Region and District	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet  MOES Statistical Abstract	Annually	There are some candidates who register for PLE but fail to sit some or all exams. However, this is a negligible number.

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.9:</b> Transition rate to Secondary (S1) by sex	This is the number of students admitted to the first Grade of secondary level of education in a given year, expressed as a proportion of the number of candidates who successfully sat and passed the final grade of the primary level of education in the previous year.  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Percent	Divide the number of students in the first grade of secondary education (S1) by the number of pupils who were enrolled in the final grade (P7) of the preceding cycle or level of education in the previous year, expressed as a percentage.  $\frac{S1(\text{year } t + 1)}{P7(\text{year } t)}$	The numerator is obtained from the Annual School Census (ASC) conducted every year.  Data on candidates' final grade examinations is obtained from the Uganda National Examinations Board (UNEB) is analyzed and number of sitting candidates who pass final grade examinations of primary level determined. Data on candidates' final grade examinations is obtained from the administrative registers of the Uganda National Examinations Board (UNEB) and analyzed to derive the number of sitting candidates who pass examinations.	Annual School Census by Ministry of Education and Sports  UNEB Results	Sex	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet	Annually	This indicator can be distorted <sup>13</sup>
<b>3.10:</b> S4 Completion rate by sex	This is the total number of students (candidates) who registered for the S4 exams regardless of age, expressed as a percentage of the population at the official secondary school graduation age (16 years).  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Percent	Divide the number of registered candidates for S4 by the 16 year old population, expressed as a percentage.	Data on candidates' final grade examinations is obtained from the administrative registers of the Uganda National Examinations Board (UNEB) and analyzed to derive the number of sitting candidates who pass examinations.  Population projections are from UBOS and are updated annually.	Administrative data from UNEB  UBOS Annual Population projections	Sex  Region and District	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet  MOES Statistical Abstract	Annually	There are some candidates who register for UCE but fail to sit some or all exams. However, this is a negligible number.

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.11:</b> Transition rate from S4 to S5 by sex	<p>This is the number of students admitted to S5 in a given year, expressed as a proportion of the number of candidates who successfully sat and passed the final grade of the senior four in the previous year.</p> <p><b>Standard classification used and manual followed:</b></p> <p>International Standard Classification of Education (ISCED) 2011</p>	Percent	<p>Divide the number of students in the first grade of secondary education (S5) by the number of pupils who were enrolled in the final grade (S4) of the preceding cycle or level of education in the previous year and expressed as a percentage.</p> $\frac{S5 (year\ t + 1)}{S4 (year\ t)}$	<p>The numerator is obtained from the annual school census conducted every year. The denominator is obtained from UNEB results.</p> <p>Data on candidates' final grade examinations from the Uganda National Examinations Board (UNEB) is analyzed and number of sitting candidates who pass final grade examinations of primary level determined.</p>	<p>Annual School Census by Ministry of Education and Sports</p> <p>UNEB Results</p>	Sex	<p>MOES website: (<a href="http://www.education.go.ug">www.education.go.ug</a>)</p> <p>Education Fact sheet</p> <p>MOES Statistical Abstract</p>	Annually	<p>This indicator can be distorted by incorrect classification between new entrants and repeaters<sup>14</sup>.</p>

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.12:</b> Literacy rate by sex	The number of persons aged 10 years and above who are able to read and write with understanding in any language divided by the population in that age group	Percent	The number of people aged 10 years and above who are literate (able to read and write in any language) divided by the total population in that same age group and expressed as a percentage	Data on Literacy are obtained through Household Surveys and the Population and Housing Census and analysed to derive the indicator.	Uganda National Household Surveys (UNHS)	Sex Residence Age Region	UNHS reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the NPHC, UNPS and the Functional Adult Literacy (FAL) Statistical Abstract (MGLSD)
<b>3.13:</b> Literacy rate at P3 by sex	This is the percentage of pupils in P3 with the ability to read and write in any language.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the number of proficient pupils in literacy by total number of pupils tested, expressed as a percentage	A National Assessment of Progress in Education (NAPE) survey is carried out annually by UNEB where a sample of pupils is selected in P.3 across the country. Tests in literacy are given to the sampled pupils and marked to determine pupil literacy	NAPE Survey	Sex Age Residence Region Ownership Government and Non-Government (Private and community)	NAPE Report Education Fact sheet MOES Statistical Abstract Education Fact Booklet MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
3.14: Literacy rate at P6 by sex	<p>This is the percentage of pupils in P6 with the ability to read and write in any language.</p> <p><b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011</p>	Percent	Divide the number of proficient pupils in literacy by total number of pupils tested, expressed as a percentage	A National Assessment of Progress in Education (NAPE) survey is carried out by UNEB annually where a sample of pupils is selected in P.6 across the country. Tests in literacy are given to the sampled pupils and marked to determine pupil literacy	NAPE Survey	Sex Age Residence Region Ownership Government and Non-Government (Private and community)	NAPE Report Education Fact sheet MOES Statistical Abstract Education Fact Booklet MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None
3.15: Numeracy rate at P3 by sex	<p>This is the percentage of pupils who can use numbers, make additions, subtraction, simple multiplication, simple division, simple weights and measures, money counting and telling time.</p> <p><b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011</p>	Percent	Divide the number of proficient pupils in numeracy by the total number of pupils tested, expressed as a percentage	A National Assessment of Progress in Education (NAPE) survey is carried out by UNEB annually where a sample of pupils is selected in P.3 across the country. Tests in numeracy are given to the sampled pupils and marked to determine the numeracy rate. Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.16:</b> Numeracy rate at P6 by sex	This is the percentage of pupils who can use numbers, make additions, subtraction, simple multiplication, simple division, simple weights and measures, money counting and telling time.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the number of proficient pupils in numeracy by the total number of pupils tested and expressed as a percentage	A National Assessment of Progress in Education (NAPE) survey is carried out by UNEB annually where a sample of pupils is selected in P.6 across the country.  Tests in numeracy are given to the sampled pupils and marked to determine the numeracy rate.	NAPE Survey	Sex Age Residence Region Ownership Government and Non-Government (Private and community)	NAPE Report Education Fact sheet  MOES Statistical Abstract Education Fact Booklet  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None
<b>3.17:</b> Pass rate by sex	This is the total number of candidates who scored between division one and division four in the end of cycle exams expressed as a percentage of the candidates that sat the end of cycle exams.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of candidates that sat and passed PLE/ UCE between division one and division four by the total number that sat, expressed as a percentage	Data on candidates' final grade examinations from UNEB is analyzed and number of sitting candidates who pass final grade examinations is determined.	UNEB Results	Sex Residence Region and District Level of education Ownership Government and Non-Government (Private and community)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet  MOES Annual Statistical Abstract	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.18:</b> Pass rate in English by sex	This is the total number of candidates that passed English with Distinctions, Credits and Passes (D1 - P8), expressed as a percentage of all candidates that sat for end of cycle exams of English.  <b>Standard classification used and manual foliowed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of candidates that sat and passed the end of cycle English examinations by the total number that sat and expressed as a percentage	Data on candidates' final grade examinations from UNEB is analyzed and number of sitting candidates who pass final grade examinations is determined.	UNEB Results	Sex Residence Region and District Level of education Ownership Government and Non-Government (Private and community)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet	Annually	<b>None</b>
<b>3.19:</b> Pass rate in Mathematics by sex	This is the total number of candidates that passed Mathematics with Distinctions, Credits and Passes (D1 - P8), expressed as a percentage of all candidates that sat for end of cycle exams of Mathematics.  <b>Standard classification used and manual foliowed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of candidates that sat and passed the end of cycle Mathematics examinations by the total number that sat and expressed as a percentage	Data on candidates' final grade examinations from UNEB is analyzed and number of sitting candidates who pass final grade examinations is determined.	UNEB Results	Sex Residence Region and District Level of education Ownership Government and Non-Government (Private and community)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet	Annually	<b>None</b>

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.20:</b> Average time taken ( <i>Minutes</i> ) to school (for day scholars) by sex.	This is the average time taken to travel to school  This indicator is measured for day scholars only	Number (Minutes)	The sum of the average travel time taken travelling to the school for all pupils/students divided by the total number of pupils/students	Information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex  Residence  Age  Region  Wealth quintile	UNHS reports  UBOS website: ( <a href="http://www.ubos.org">www.ubos.org</a> )	3 years	<b>None</b>
<b>3.21:</b> Proportion of schools with separate stances for females and males	This is the proportion of schools with access to basic sanitation facility separately for girls.  <b>Standard classification used and manual foliowed:</b>  Basic sanitation facilities are defined as functional sanitation facilities separated for males and females on or near the premises.	Percent	Total number of schools by level of education (primary, lower secondary and upper secondary) with access to basic sanitation facility separately for each sex divided by the total number of schools, expressed as a percentage.	The information is obtained from the annual school census conducted every year.	Annual School Census by Ministry of Education and Sports	Residence  Region  Level of education (primary, lower secondary and upper secondary)  School Ownership (Government and Non-Government)	MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )  Education Fact sheet	Annually	The international definition considers only improved toilet facilities
<b>3.22:</b> Pupil/student stance ratio	The average number of pupils/students per latrine stance at a specific level of education in a given school year.	Ratio	The total number pupils/students enrolled in a given year divided by the number of toilet/latrine stances in the same year	The information is obtained from the annual school census conducted every year.	Annual School Census by Ministry of Education and Sports	Sex  Region and District  Level of education (primary, lower secondary and upper secondary)	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.23:</b> BT/VET enrolment by sex	This is the total enrolment at the BT/VET level of education.	Number	Total number of persons enrolled at BT/VET level of education.	The number is got from the Census of Higher Educational Institutions conducted by the Ministry of Education and Sports.	Census of Higher Educational Institutions conducted by the Ministry of Education and Sports	Sex  Region and District	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None
<b>3.24:</b> University enrolment by sex	This is the total enrolment at the University level of education	Number	Total number of persons enrolled at university level of education	The number is got from the Census of Higher Educational Institutions conducted by the Ministry of Education and Sports.	Census of Higher Educational Institutions conducted by the Ministry of Education and Sports	Sex  Region and District	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None
<b>3.25:</b> Tertiary enrolment by sex	This is the total enrolment at the Tertiary level of education.  NB: Tertiary level included University level and Diploma awarding institutions	Number	Total number of persons enrolled at Tertiary level of education.	The number is got from the Census of Higher Educational Institutions conducted by the Ministry of Education and Sports.	Census of Higher Educational Institutions conducted by the Ministry of Education and Sports	Sex  Region and District	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.26:</b> Proportion of females among tertiary education teachers or professors		Percent	Total number of female tertiary education teachers/professors divided by the total number of tertiary education professors, expressed as a percentage.	The number is got from the Census of Higher Educational Institutions conducted by the Ministry of Education and Sports.	Census of Higher Educational Institutions conducted by the Ministry of Education and Sports	Region and District	Education Fact sheet  MOES Annual Statistical Abstract	Annually	None
<b>3.27:</b> Average (Mean) years of schooling of the population aged 25 years and older by sex	The average number of completed years of education of a country's population aged 25 years and above, excluding years spent repeating individual grades.  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Years	The Mean Years of Schooling is the summation across age groups of the proportion of the population that attained a given level of education multiplied by the official duration of that level.	Data on Education Attainment are obtained through Household Surveys and analysed to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Surveys (UNHS)	Sex  Residence	UNHS reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from UNPS, UDHS and NPHC

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.28: Educational Attainment of the population aged 25 years and older by sex</b>	<p>The highest level of education completed in a formal education system</p> <p><b>Standard classification used and manual followed:</b></p> <p>International Standard Classification of Education (ISCED) 2011</p>	Percent	<p>The total number of persons aged 25+ who completed a given level divided total number of persons aged 25+, expressed as a percentage.</p>	<p>Data on Education Attainment are obtained through Household Surveys and the Population and Housing Census and analysed to derive the indicator.</p> <p>The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.</p>	<p>Uganda National Household Surveys (UNHS)</p>	<p>Sex</p> <p>Age</p> <p>Residence</p>	<p>UNHS reports</p> <p>UBOS Annual Statistical Abstract</p> <p>UBOS Website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	<p>Every 3 years</p>	<p>Can also be obtained from UNPS, UDHS and NPHC</p>

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>3.29:</b> School drop-out rate by sex	<p>This is the percentage of pupils / students enrolled in a given grade, cycle or level of education in a given school year that have left school either voluntarily or otherwise.</p> <p><b>Standard classification used and manual followed:</b></p> <p>International Standard Classification of Education (ISCED) 2011</p>	Percent	<p>The number of school dropouts in a given year divided by the total enrolment in the same year expressed as a percentage</p> <p>Drop-out is the difference between pupils/ students enrolment in the first term of a given school year and the pupils/ students sitting end of final term (third term) of the same school year.</p>	TBD					

## 5.4. Energy and Mineral Development Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>4.1:</b> Percentage of the population with primary reliance on non-solid fuels by sex of household head.	The proportion of population with primary reliance on non-solid fuels and technology at the household level <sup>15</sup> .	Percent	Number of people using non-solid fuels for cooking, heating and lighting divided by total population reporting that any cooking, heating or lighting expressed as a percentage.	Information on the population with primary reliance on non-solid fuels is obtained from censuses and surveys. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex of household head,  Residence  Region  Wealth quintile	UNHS reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from UNPS, UDHS and NPHC

## 5.5. Health Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.1:</b> Proportion of children who are exclusively breast-fed for six months	Proportion of children aged less than six months who are given nothing but breast milk in the 24 hours preceding the survey (interview day)	Percent	Children given nothing but breast milk in the 24 hours preceding the survey divided by number of living children born 0 – 35 months before the survey, expressed as a percentage	Information is obtained from Uganda Demographic and Health Survey.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Region  Household  Wealth quintile	UDHS Reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	None
<b>5.2:</b> Prevalence of stunting in children under 5 years of age by sex	The proportion of children under five years of age who are short for their age (Chronically undernourished)  <b>Standard classification used and manual followed:</b>  World Health Organization (WHO) Child Growth Standards  This measures the proportional distribution of stunting ((height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) children in the country	Percent	Number of under-fives falling below minus 2 standard deviations from the median height-for-age of the children under 5 years of age in the surveyed population, expressed as a percentage	Information is obtained from Uganda Demographic and Health Survey.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Region  Household  Wealth quintile	UDHS Report  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
5.3: Prevalence of wasting in children under 5 years of age by sex	The proportion of children under five years of age who are too thin for their height (Acutely undernourished)		Number of under-fives falling below minus 2 standard deviations from the median weight for height of the children under 5 years of age in the surveyed population, expressed as a percentage	Information is obtained from Uganda Demographic and Health Survey.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Region  Household Wealth quintile	UDHS Report  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	None
5.4: Prevalence of under-weight children under 5 years of age by sex	World Health Organization (WHO) Child Growth Standards  <b>Standard classification used and manual followed:</b>  This refers to the moderate measures below minus two standard deviations from the median weight for age of reference population; and severe measures below minus three standard deviations from median weight for age of reference population.	Percent	Number of under-fives falling below minus 2 standard deviations from the median weight for age of the children under 5 years of age in the surveyed population, expressed as a percentage	Information is obtained from Uganda Demographic and Health Survey.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Region  Household Wealth quintile	UDHS Report  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  Every 5 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<p><b>5.5:</b> Prevalence of anaemia among women of reproductive age</p>	<p>The percentage of women of reproductive age (15 – 49 years) who are anaemic i.e. with Packed Cell Volume (PCV) less than 30%,</p> <p><b>Standard classification used and manual followed:</b></p> <p>Degrees of the anaemia condition as</p> <p>Mild (PCV 27-29%)</p> <p>Moderate (PCV 19-26%)</p> <p>Severe (PCV below 19%)</p>	Percent	Number of women are anaemic divided by the total women in 15-49 years age group expressed as a percentage	<p>Information is obtained from Uganda Demographic and Health Survey.</p> <p>The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.</p>	Uganda Demographic and Health Survey (UDHS)	<p>Sex</p> <p>Residence</p> <p>Age</p> <p>Region</p> <p>Household</p> <p>Wealth quintile</p>	<p>UDHS Report</p> <p>UBOS Annual Statistical Abstract</p> <p>UBOS Website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	Every 5 years	None
<p><b>5.6:</b> Infant Mortality rate per 1,000 live births by sex</p>	<p>This is the probability of a child born in a specific year or period dying before reaching the age of one year.</p>	Rate	<p>The ratio of deaths of children aged less than one year divided by the total births.</p> <p>The above is then converted into the Probability of dying.</p>	<p>Information is obtained from Uganda Demographic and Health Survey (Birth history section).</p> <p>The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.</p>	Uganda Demographic and Health Survey (UDHS)	<p>Sex</p> <p>Residence</p> <p>Region</p> <p>Household</p> <p>Wealth quintile</p>	<p>UDHS Report</p> <p>UBOS Annual Statistical Abstract</p> <p>UBOS Website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	After every 5 Years	Can also be obtained from the NPHC

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.7: Under five mortality rate per 1,000 live births by sex</b>	This is the probability of a child born in a specific year or period dying before reaching the age of five years.	Rate	The ratio of deaths of children aged less than five years divided by the total births.  The above is then converted into the Probability of dying.	Information is obtained from Uganda Demographic and Health Survey (Birth history section).  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Region  Household  Wealth  quintile	UDHS Report  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	After every 5 Years	Can also be obtained from the data from the NPHC
<b>5.8: Maternal Mortality Ratio</b>	This is the maternal deaths for a specified period per 100,000 live births.  Maternal deaths are deaths of women from any cause related to or aggravated by pregnancy or its management (excluding accidental or incidental causes) during pregnancy and childbirth or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy. NB: Maternal deaths excludes deaths from violence or accidents	Ratio	Number of maternal deaths in a given period divided by the total number of recorded live births in the same period multiplied by 100,000.	The data used to compile the maternal mortality ratio are derived from Daily Recording and monthly and weekly summaries and reporting under the DHIS-2 OR The Uganda Demographic and Health Survey (UDHS).	Ministry of Health- District Health Information System (DHIS-2)  Uganda Demographic and Health Survey (UDHS)	Location	MOH Resource Centre.  MOH Annual Statistical Abstract  UDHS Reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually  After every 5 years	Under reporting of maternal deaths – DHIS-2 covers only deaths occurring in a health facility.  Can also be obtained from the data from the NPHC WHO uses a socio-economic parameters to project annual figures for this indicator

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<b>5.9:</b> Proportion of births attended by skilled health personnel	This is the percentage of deliveries taking place in a health facility (GOU and PNFP) that are supervised by a trained health professional. This measures utilization of maternal health services	Percent	Number of deliveries taking place in GOU and PNFP health facilities divided by the number of expected deliveries expressed as a percentage	Information is obtained from the Uganda Demographic and Health Survey (UDHS) OR Information on deliveries per health facility supervised by health Professionals is derived from the DHIS-2 and compiled monthly to derive the indicator	UDHS Ministry of Health- District Health Information System (DHIS-2)	Sex Residence Region Household Wealth quintile Type of Health Facility	MOH Annual Statistical Abstract UDHS Reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Five years Annually	None
<b>5.10:</b> Proportion of births that are high risk	This is the proportion of births that are subjected to an elevated risk of mortality due to mothers age at birth, parity or birth interval	Percent	Number of births that are subjected to avoidable elevated risk of mortality divided by the number of expected births expressed as a percentage	Information is obtained from the Uganda Demographic and Health Survey (UDHS)	Uganda Demographic and Health Survey (UDHS)	Type of risk.	UDHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 Years	Can also be obtained from the NPHC Household questionnaires, although it may not collect information on all avoidable risks
<b>5.11:</b> Proportion of women attending at least four antenatal care visits	Antenatal care <sup>16</sup> (ANC) constitutes screening for health and socio-economic conditions likely to increase the possibility of specific adverse pregnancy outcomes, providing therapeutic interventions known to be effective, and educating pregnant women about planning for safe birth and emergencies during pregnancy and how to deal with them	Percent	The number of women aged 15-49 with a live birth in a given time period that received antenatal care (at least four or more times) divided by the total number of women aged 15-49 with a live birth in the same period, expressed as a percentage	Information is obtained from Uganda Demographic and health Survey. For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator. Information on ANC services per health facility supervised by health Professionals is derived from the DHIS-2 and compiled monthly	Uganda Demographic and health Survey (UDHS) District Health Information System (DHIS-2)	Sex Residence Age Region Household Wealth quintile	UDHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> ) MOH DHIS-2	Every 5 Years Annually	Can also be obtained for the DHIS-2 for facility based cases only

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.12:</b> Proportion of women attending first ANC in the first trimester	This is the percentage of women aged 15-49 who received their first ANC during the first trimester of the most recent pregnancy	Percent	The number of women aged 15-49 with a live birth in a given time period that received their first antenatal care during the first trimester of the most recent pregnancy divided by the total number of women aged 15-49 with a live birth in the same period, expressed as a percentage	Information is obtained from Uganda Demographic and health Survey. For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator. Information on ANC services per health facility supervised by health Professionals is derived from the DHS-2 and compiled monthly	UDHS	Sex Residence Age Region Household Wealth quintile	UDHS reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )  MoH DHS-2	Every 5 Years  Annually	None
<b>5.13:</b> Total Fertility Rate	This is the average number of children who would be born to each woman in her reproductive age (15-49) following a particular ASFR during a particular period.	Number	UDHS: computed directly from the woman's birth history. $5 * \frac{\sum_{i=1}^5 T_{i, ASFR}^{(15-49)}}{\sum_{i=1}^5 T_{i, ASFR}^{(15-49)}}$ ASFR = Divide the total number of births to women in a given age group in a given period by the years of exposure of women in that age group	Information is obtained from Uganda Demographic and health Survey. For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic Health Surveys (UDHS)	Sex Residence Region Household Wealth quintile	UDHS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the NPHC using the cumulative parity fertility P/F Ratio (Brass method)

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<b>5.14:</b> Adolescent Birth Rate (15-19 years) per 1,000 women in that age group.	The number of births to women ages 15–19 per 1,000 women in that age group per year <sup>17</sup>	Per 1,000 women	UDHS: computed directly from the woman's birth history.  Divide the total number of births to adolescents in a given period by the years of exposure of adolescent women, and multiplied by 1,000	Information is obtained from Uganda Demographic and health Survey.  For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic Health Surveys (UDHS)	Residence	UDHS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the NPHC using the cumulative parity fertility P/F Ratio (Brass method)
<b>5.15:</b> Teen-age Child-bearing	The percentage of women 15 – 19 who are either mothers or carrying their first pregnancy	Percent	Number of women aged 15 – 19 who are either mothers or carrying their first pregnancy divided by the total number of women 15 – 19 expressed as a percentage	Information is obtained from Uganda Demographic and health Survey.  For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic Health Surveys (UDHS)	Residence	UDHS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the NPHC
<b>5.16:</b> Contraceptive Prevalence Rate	This refers to the percentage of women who are practicing (or whose sexual partners are practicing) any form of contraception.  <b>Standard classification used and manual followed:</b>  This is reported for women of reproductive age (15-49 years).	Percent	The number of currently married women aged 15-49 years who report that they are practicing (or whose sexual partners are practicing) any form of contraception divided by the total number of currently married women aged 15-49 years expressed as a percentage	Data to derive the indicator is obtained from Demographic and Health Surveys.  For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Sex  Residence  Age  Region  Household Wealth quintile  Type of method	UDHS Reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.17:</b> Adolescent Contraceptive Prevalence Rate	The percentage of women aged 15-19 who are practicing, or whose sexual partners are practicing any form of contraception.	Percent	The number of women aged 15-19 years who report that they are practicing (or whose sexual partners are practicing) any form of contraception divided by the total number of women aged 15-19 years expressed as a percentage	Data to derive the indicator is obtained from Demographic and Health Surveys.  For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Residence Type of method	UDHS Report  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the UNPS
<b>5.18:</b> Life Expectancy at birth by sex.	This is the average number of years that a newborn is expected to live if current mortality rates continue to apply.	Number	By constructing a Life table, the Age specific death rates are used to generate survival probabilities, which in turn are used to generate number of person-years expected to be lived by a birth cohort at each exact age. The Life expectancy at birth is computed as the Person years expected to be lived from birth divided by the size of the birth cohort at birth.	The Age specific death rates are derived from the mortality questions asked during the Population and Housing Census.	National Population and Housing Census (NPHC)	Region and districts	NPHC Reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 10 years	
<b>5.19:</b> Adult mortality by cause and age groups	Number of deaths in a given age group attributed to a particular cause,  <b>Standard classification used and manual followed:</b>  International Statistical Classification of Diseases and Related Health Problems, 10th revision (ICD-10)	Percent	Total deaths from a given cause for a given age group over a specified period divided by total deaths in the same age group over the same period, expressed as a percentage	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys.  For household surveys, the information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Region Age Sex	UDHS Reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	After 5 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<b>5.20:</b> Proportion of the population living with HIV/AIDS by sex.	This is the total number of people who tested HIV positive out of the total number of people tested in the population in the country.  This measures the HIV infection rate in the country <sup>18</sup> .	Percent	Number of people who tested HIV positive expressed as a percentage of the total number of persons tested.	Data is obtained from the Uganda Population HIV Impact Assessment Surveys and the analysis is done to derive the indicator	Uganda Population HIV Impact Assessment Surveys (UP-HIA);	Sex  Age  Region	MoH Annual Statistical Abstract  MoH Website ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Every 5 Years	Can also be obtained from HIV Surveillance sites by the Ministry of Health
<b>5.21:</b> HIV/AIDS prevalence among pregnant women.	This is the number of pregnant women who tested positive out of the total number of pregnant women tested. This measures the HIV infection rate among pregnant women in the country.	Percent	No. of pregnant women who test positive expressed as a percentage of those tested	Data is obtained from the Uganda Population HIV Impact Assessment Surveys and the analysis is done to derive the indicator	Uganda Population HIV Impact Assessment Surveys (UP-HIA);	Sex  Age  Region	HIV/AIDS surveillance reports  MoH Resource Centre.  MoH Annual Statistical Abstract  MoH Website ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Every 5 Years	Can also be obtained from HIV Surveillance sites by the Ministry of Health
<b>5.22:</b> Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations.	This is the new HIV infections during a specified period per 1000 uninfected persons.	Ratio	The number of new HIV infections in a given period divided by the total number of uninfected persons in the same period multiplied by 1,000.	TBD					
<b>5.23:</b> Proportion of HIV/AIDS pregnant women enrolled on EMCTCT (Elimination of Mother to Child Transmission)	Percentage of mothers who were offered ARVs during pregnancy, labour or delivery to prevent mother to child transmission of HIV/AIDS	Percent	Number of women who were offered ARVs during pregnancy, labour or delivery to prevent mother to child transmission divide by the pregnant mothers aged 15-49 who were positive	Data is obtained through ANC surveillance conducted annually.  ANC reports from sentinel sites are compiled and submitted to the Ministry, where analysis is done to derive the indicator.	Ministry of Health Ante-Natal Care Surveillance (Sentinel Sites) ;	District	HIV/AIDS surveillance reports  MoH Resource Centre.  MoH Annual Statistical Abstract  MoH Website ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.24:</b> Proportion of eligible persons receiving ARVs by sex.	Percentage of HIV infected Persons receiving Antiretroviral drugs  This measures the coverage of HIV/AIDS services in particular providing (Antiretroviral therapy) ARVs in the country	Percent	Total number of HIV positive persons receiving ARV services expressed as a percentage of the total number of HIV positive persons	Data is obtained from the Uganda Population HIV Impact Assessment Surveys and the analysis is done to derive the indicator	Uganda Population HIV Impact Assessment Surveys (UP-HIA);	Sex Age Region	HIV/AIDS surveillance reports MoH Resource Centre. MoH Annual Statistical Abstract MoH Website: ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Every 5 Years	Can also be obtained from HIV Surveillance sites by the Ministry of Health
<b>5.25:</b> Proportion of HIV positive adolescents accessing ARVs by sex.	This is the share of the HIV positive adolescent population receiving Antiretroviral drugs (ARVs).  It is a measure of coverage of HIV/AIDS services in particular providing ARVs among adolescents in the country	Percent	Total number of persons HIV positive persons aged 15 – 24 years receiving ARV services expressed as a percentage of the total number of HIV positive persons aged 15 – 24 years	Data is obtained from the Uganda Population HIV Impact Assessment Surveys and the analysis is done to derive the indicator	Uganda Population HIV Impact Assessment Surveys (UP-HIA);	Sex Age Region	HIV/AIDS surveillance reports MoH Resource Centre. MoH Annual Statistical Abstract MoH Website: ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Every 5 Years	Can also be obtained from HIV Surveillance sites by the Ministry of Health
<b>5.26:</b> Prevalence of lower respiratory infections by Sex.	This refers to the total number of people with lower respiratory infections expressed as a percentage of the total population.	Percent	Total number of People with lower respiratory infections divided by the total population expressed as a percentage	Information on the lower respiratory infections is obtained from the health facilities captured and analysed through the District Health Information System (DHIS-2) to derive the indicator.	Ministry of Health- District Health Information System (DHIS-2)	Sex Residence Age District Facility	MoH Annual Statistical Abstract MoH Website: ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<b>5.39:</b> Prevalence of lower respiratory infections in children under 5 years by sex.	This refers to the total number of children under years of age with lower respiratory infections expressed as a percentage of the total children under years of age.  ARI symptoms consist of cough accompanied by (1) short, rapid breathing that is Chest-related and/or (2) difficult breathing that is chest-related.	Percent	Total number of children under five years of age with lower respiratory infections divided by the total number of children under 5 years of age expressed as a percentage	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys.  The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda Demographic and Health Survey (UDHS)	Region Age Sex Wealth quintile	UDHS Reports  UBOS Annual Statistical Abstract  UBOS Website (www.ubos.org)	5 years	Can also be obtained annually from the Ministry of Health-District Health Information System (DHIS-2)
<b>5.25:</b> Smoking prevalence among persons aged 15 and over, by sex	The proportion of the population aged 15 and overs who smoked cigarettes or any other type of tobacco, daily or occasionally (less than daily)	Percent	The total number of persons aged 15 and over who smoked divided by the total population aged 15 and over expressed as a percentage	Data to derive the indicator is obtained from the Demographic and Health Survey (UDHS). The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda Demographic and Health Survey (UDHS)	Region Age Sex Wealth quintile	UDHS Reports  UBOS Website (www.ubos.org)	5 years	None
<b>5.29:</b> Proportion of adults who are obese, by sex.  <b>Proxy:</b> Proportion of adults who are obese among persons aged 15 – 49 years by sex	Obesity is when one's Body Mass Index (kgs/m <sup>2</sup> ) is greater or equal to 30.0	Percent	The total number of persons aged 15 – 49 who are obese divided by the total population aged 15 – 49 years expressed as a percentage	Data to derive the indicator is obtained from the Uganda Demographic and Health Surveys.  The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda Demographic and Health Surveys (UDHS)	Region Age Sex Wealth quintile	UDHS Reports  UBOS Website (www.ubos.org)	5 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.30:</b> Proportion of the population with Health Insurance by sex.	Proportion of population aged 15 years and above are covered with specific types of health insurance	Percent	The total number of people aged 15 years and above who report that they are covered by a specific type of health insurance divide by the population aged 15 years, expressed as a percentage	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Age Region Wealth quintile Type of insurance policy	UNHS Reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UDHS for persons 15 – 49 years
<b>5.31:</b> Proportion of the population living within a radius of 5 km from a health facility.	This is the percentage of the population residing within 5 kilometres of a health facility that is either public or private not for profit. It is used to measure the geographical access to health facilities	Percent	Total number of persons residing within 5 kilometres of health facility in the facility's catchment population expressed as a percentage of the total population in the health facility's catchment population	Information on the population residing within 5 kilometres of a health facility is obtained through census and Household Information (the UNHS and UDHS) and analysed to derive the indicator.	Uganda National Demographic and Health Survey (UDHS)  Uganda National Household Survey (UNHS)	Sex Residence Residence Type of Facility	UDHS reports  UNHS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years  Every 5 years	Can also be obtained from the UNPS, NPHC and the DHS-2
<b>5.32:</b> Average time taken (Minutes) travelling to the health facility by sex	This is the average time spent travelling to the health facility by sex of the individuals  The health facility is the place where the first consultation was sought for the most recent sickness within the 30 days preceding the survey	Minutes	Average time taken travelling to the health facility	Data is collected from sample surveys. The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth quintile	UNHS reports	3 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
<b>5.33:</b> Ratio of practicing medical officers (doctors) to population	This is the number of practicing doctors to the population of the country  Doctors include general practitioners and specialists (surgeons, anaesthetists, obstetricians, emergency medicine specialists, cardiologists, paediatricians, psychiatrists, ophthalmologists, gynaecologists etc.),  <b>Standard classification used and manual followed:</b>  Ministry of Health DHIS-2 Manual	Ratio	Number of practicing doctors divided by the total population in the area multiplied by 1,000	Information on number of doctors is obtained from the health facilities.  The data obtained is analysed through the District Health Information System (DHIS-2) to derive the indicator.	Ministry of Health- District Health Information System (DHIS-2)	Sex  District  Type of Facility	MoH Resource Centre.  MoH Annual Statistical Abstract	Annually	None
<b>5.34:</b> Ratio of practicing nurses to population.	This is a measure of the proportional density of nurses to the population of the country	Ratio	Number of practicing nurses divided by the total population in the area multiplied by 1,000.	Information on number of nurses is obtained from the health facilities.  The data obtained is analysed through the District Health Information System (DHIS-2) to derive the indicator.  Information on certified nurses is obtained from the Uganda Nurses and Midwives Council	Uganda Nurses and Midwives Council  Ministry of Health- District Health Information System (DHIS-2)	Sex  Residence  District  Type of Facility  Level (Degree/ Diploma/ Certificate)	MoH Resource Centre.  MoH Annual Statistical Abstract	Annually	None
<b>5.35:</b> Ratio of practicing midwives to women	This is the number of practicing midwives to the women of reproductive age (15 – 49) in the country	Ratio	Number of practicing midwives divided by the women of reproductive age (15 – 49 years) in the area multiplied by 1,000	Information on number of midwives are available in the MIS unit which can be compiled by residence	MoH  Nurses and Midwives Council	District	National Human Resource for Health System (NHRHS)	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>5.36:</b> Ratio of practicing Anaesthetical Officers to population	This is the number of practicing Anaesthetical Officers to the population of the country	Ratio	Number of practicing Anaesthetical Officers divided by the total population in the area multiplied by 1,000	Information on number of Anaesthetical Officers are available in the MIS unit which can be compiled by residence	MoH Allied Health Professionals Council	District	National Human Resource for Health System (NHRHS)	Annually	None
<b>5.37:</b> Ratio of practicing Anaesthetical Officers to women	This is the number of practicing Anaesthetical Officers to the women of reproductive age (15 – 49) in the country	Ratio	Number of practicing Anaesthetical Officers divided by the women of reproductive age (15 – 49 ears) in the area multiplied by 1,000	Information on number of Anaesthetical Officers are available in the MIS unit which can be compiled by residence	MoH - Allied Health Professionals Council	District	National Human Resource for Health System (NHRHS)	Annually	None

## 5.6. ICT and National Guidance Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>6.1:</b> Proportion of individuals who own mobile phones individually by sex.	This is the percentage of individuals who own a mobile telephone individually, by sex <sup>19</sup> .	Percent	This is the number of adults (15+) who own a mobile telephone individually divided by the total adult population, expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS
<b>6.2:</b> Proportion of individuals who own mobile phones jointly by sex.	This is the 'percentage of individuals who own a mobile telephone jointly with another individual, by sex'.	Percent	This is the number of adults (15+) who own a mobile telephone jointly divided by the total adult population, expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS
<b>6.3:</b> Proportion of individuals using mobile phones by sex.	This is the 'percentage of individuals who during the last 3 months used a mobile telephone for voice/text communication or to access the internet/social media, whether owned or borrowed/hired by sex'.	Percent	This is the number of adults (15+) who used a mobile telephone in the last three months divided by the total adult population, expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>6.4:</b> Proportion of households that own a Television by sex of head	The percentage of households owning functional Television set	Percent	This is the number of households which own a functional television set divided by the total number of households, expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS
<b>6.5:</b> Proportion of individuals using the internet by sex.	This indicator is defined as the proportion of individuals who used the Internet from any location in the last three months.  The Internet is a worldwide public computer network. It provides access to a number of communication services including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used (not assumed to be only via a computer – it may also be by mobile telephone, tablet, PDA, games machine, digital TV etc.). Access can be via a fixed or mobile network.	Percent	Number of people having internet connection (any form) divided by the total adult population, expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the NPHC and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>6.6:</b> Proportion of households with access to mass media (Radio, TV, Newspapers) by sex of household head	This is the proportion of households with access to mass media  Mass media includes radio, television, and newspapers accessibility.	Percent	Number of households with access to mass media(radio, TV, internet etc.) divided by the total number of households expressed as a percentage	Data is obtained from household and Panel surveys to derive the indicator. The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Residence Region Wealth Quintile	UNHS reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UDHS
<b>6.7:</b> Proportion of individuals using social media by sex	TBD								

## 5.7. Justice, Law and Order Sector

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>7.1:</b> Crime Victimization Rate by sex.	The proportion of the population directly affected by crime  <b>Standard classification used and manual followed:</b> Uganda Police Force Standard Orders and the International Classification of Crime for Statistical Purposes (ICCS)	Percent	Number of persons directly affected by crime divided by the total population expressed as a percentage	Data is obtained from Crime Victims surveys to derive the indicator.  The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Crime Victims Survey (CVS)	Sex Age Region Type of Crime	CVS Reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	After 3 years	None
<b>7.2:</b> Proportion of child related crime	Measures the proportion of cases involving children over total crime.  <b>Standard classification used and manual followed:</b> Uganda Police Force Standard Orders and the International Classification of Crime for Statistical Purposes (ICCS)	Percent	Number of criminal cases involving children (as offenders or offended) divided by total number of criminal cases reported expressed during a given period as a percentage	Aggregated data from Police units is to be obtained from the Uganda Police Records (PF1) and analyzed to generate the indicator	Police crime reports.	District	Annual Crime Reports	Annual	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>7.3:</b> Proportion of police officers who are female	The proportion of women among the Police Officers  <b>Standard classification used and manual followed:</b> Uganda Police Force Standard Orders Officers are at the Rank of Constable to IGP	Percent	Number of female Police officers divided by the total number of Police officers expressed as a percentage	Primary data collected from various police regions and departments	Police Reports	District Rank	Annual Police Report	Annual	None
<b>7.4:</b> Proportion of female judges	The proportion of women among the judges	Percent	Number of female judges divided by the total number of judges expressed as a percentage	Compiled from the Human Resource records of the Judicial Service Commission	Judicial Service Commission	Level of Court		Annual	None

## 5.8. Lands and Housing Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>8.1:</b> Proportion of the population owning land individually by sex of owner	This is the percentage of the adult population in the country who own land individually (irrespective of purpose or current use) by sex	Percent	Number of persons (18 years and above) who own land individually in the country divided by the total population aged 18 years or more expressed as a percentage	Household information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator. The administrative data on land ownership is derived from the Lands Information system at the ML-HUD	Uganda National Household Survey (UNHS)  Administrative data (Land Information System)	Sex  Age Region  Land tenure system 1. Mailo Land 2. Freehold 3. Leasehold 4. Customary land 5. Public Land	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS and UCAAL
<b>8.2:</b> Proportion of the population owning land jointly by sex of owner.	This is the percentage of the adult population in the country who own land jointly with any other person (irrespective of purpose or current use) by sex	Percent	Number of persons (18 years and above) who own land jointly in the country divided by the total population aged 18 years or more expressed as a percentage	Household information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator. The administrative data on land ownership is derived from the Lands Information system at the ML-HUD	Uganda National Household Survey (UNHS)  Administrative data (Land Information System)	Sex Age Land tenure system 1. Mailo Land 2. Freehold 3. Leasehold 4. Customary land 5. Public Land	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the UNPS and UCAAL

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>8.3: Proportion of the population owning houses</b>	This is the percentage of the population in the country who own a house (individually or jointly, whether being used by the household or not).	Percent	Number of persons (18 years and above) who own a house divided by the total population aged 18 years and above, expressed as a percentage	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex Age Region Mode of ownership (individually or jointly)	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 years	Can also be obtained from the NPHC, UNPS and UCAAL

## 5.9. Public Sector Management Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>9.1:</b> Percentage of MDAs and LGs with policies, plans and budgets that promote gender equity and equality	This is the proportion of institutions with policies, plans and or budgets that promote Gender equality and equity	Percent	No. of Institutions with policies/plans/ budgets divided by total No. of institutions expressed as a percentage	Data is obtained from administrative reports The data is centrally captured and analysed to derive the indicator	MFPED – Budget Analysis and Monitoring Unit (BAMU) Reports NPA OPM EOC	District	MFPED – Budget Analysis and Monitoring Unit (BAMU) reports NPA Reports MGLSD reports EOC reports	Annually	None
<b>9.2:</b> Proportion of institutions with systems to track and make public allocation for gender equality and women's empowerment	This is the proportion of institutions with systems / operational mechanisms to track and allocate funds towards gender equality and women empowerment.	Percent	Number of institutions that have a system for tracking and making public allocations for gender equality and women's empowerment/ Total number of institutions multiply by 100	Data is obtained from administrative reports The data is centrally captured and analysed to derive the indicator	MoFPED MGLSD	District	MoFPED reports MGLSD reports	Annually	None
<b>9.3:</b> Proportion of government recurrent and capital spending going to sectors that disproportionately benefit women, the poor and vulnerable groups	This is the proportion of actual government expenditures on sector that specifically benefit women.	Percent	Vote for the Gender (Allocation for Gender) over the total budget expressed as a percentage	Data is obtained from administrative reports The data is centrally captured and analyzed to derive the indicator	MoFPED EOC MGLSD	District	MoFPED abstract MoFPED Website EOC reports MGLSD reports	Annually	None

## 5.10. Science, Technology and Innovation Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>10.1:</b> Ratio of graduates in Science & Technology to Arts by sex	This measures the relative distribution of male and female graduates in Science & Technology to Arts  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Ratio	Divide the total number of graduates in Science & Technology by the number of graduates in Arts, expressed as a percentage.	Data from the Administrative Registers on the graduating students is obtained from the higher institutions of learning by the Ministry of Education and Sports and analysed to derive the indicator.	Administrative data from higher Education Institutions	Sex Residence Region Level of education	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annual	None
<b>10.2:</b> Proportion of females among science, engineering, manufacturing and construction graduates at tertiary level by sex.	This measures the share of female among graduates in Science & Technology to Arts  <b>Standard classification used and manual followed:</b> International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of females who passed in science, engineering, manufacturing and construction by the total candidates who passed in science, engineering, manufacturing and construction, expressed as a percentage.	Data from the Administrative Registers on the graduating students is obtained from the higher institutions of learning by the Ministry of Education and Sports and analysed to derive the indicator.	Administrative data from higher Education Institutions	Region Sex Residence Level of education Location, Region	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annual	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and Limitations
10.3: Proportion of engineering graduates by sex	This is the proportion of graduates in engineering at tertiary levels by sex  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of males and/or females who passed in engineering by the total candidates who passed and expressed as a percentage.	Data from the Administrative Registers on the graduating students is obtained from the higher institutions of learning by the Ministry of Education and Sports and analysed to derive the indicator.	Administrative data from higher Education Institutions	Region	Education Fact sheet  MOES Annual Statistical Abstract	Annually	None
						Sex  Residence  Level of education location, Region  Engineering (civil, architect, electrical mechanical)  Graduation level (Degree & Diploma)			
10.4: Proportion of science graduate teachers by sex	This is the proportion of science graduate teachers in a country  <b>Standard classification used and manual followed:</b>  International Standard Classification of Education (ISCED) 2011	Percent	Divide the total number of science graduate teachers by the total number of graduate teachers, expressed as a percentage.	Data from the Administrative Registers on the graduating students is obtained from the higher institutions of learning by the Ministry of Education and Sports and analysed to derive the indicator.	Administrative data from higher Education Institutions	Sex  Residence  Region  Level of education location, Region  Graduation level (Degree & Diploma)	Education Fact sheet  MOES Annual Statistical Abstract  MOES website: ( <a href="http://www.education.go.ug">www.education.go.ug</a> )	Annually	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>10.5:</b> Proportion of Medical officers, clinical officers and allied dentists and dental practitioners by sex	This is the proportion of medical officers, clinical officers and allied dental practitioners by sex	Ratio	Divide the total number of medical officers, clinical officers and allied dental practitioners by the total candidates passed and expressed as a percentage.	Data from the Administrative Registers on the graduating students is obtained from the higher institutions of learning by the Ministry of Education and Sports and analysed to derive the indicator.	Administrative data from higher Education Institutions	Sex Residence Region Level of education location, Region Engineering (civil, architect, electrical mechanical) Graduation level (Degree & Diploma)	MoH Resource Centre. MoH Annual Statistical Abstract MoH Website ( <a href="http://www.health.go.ug">www.health.go.ug</a> )	Annually	None

## 5.1.1. Social Development Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.1:</b> Average wage earnings in formal employment by sex. <b>Proxy:</b> Median monthly cash earnings for persons in paid employment in the formal sector	This is the average monthly earnings received by an individual in formal employment	UGX	Payroll (Total employee earnings in formal employment) divided by the total employment.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Region Industry/ Sector Occupation	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS
<b>11.2:</b> Average wage earnings in informal employment by sex. <b>Proxy:</b> Median monthly cash earnings for persons in paid employment in the informal sector	This is the average monthly earnings received by an individual in informal employment <sup>20</sup> .	UGX	Total employee earnings in informal employment divided by the total informal employment.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Region Industry/ Sector Occupation	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.3:</b> Youth unemployment rate by sex.	This refers to the proportion of the youth population (18-30 years) without work, looking for work and available for work during specified reference period (one week) by sex.  <b>Standard classification used and manual followed:</b>  Employment as defined by the 17 <sup>th</sup> International conference of Labour Statisticians	Percent	The unemployed youth divided by the youth population in the labour force expressed as a percentage	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age Region	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS
<b>11.4:</b> Proportion of young people (aged 15 - 30 years) who are NEET <sup>21</sup> by sex.	The NEET is defined as the percentage of young people (15-30 years old) who are neither in employment nor in education or training.  NEET provides a measure of youth who are outside the educational system, not in training and not in employment, and thus serves as a broader measure of potential youth labour market entrants than youth unemployment.	Percent	Number of youth (18-30 years old) who are not in employment and not in education or training. NEET / Total Youth) x 100	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age • 15 – 24 • 18 – 30 Region	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.5:</b> Proportion of children aged 5 – 17 years engaged in child labour by sex.	<p>This refers to the distribution of children engaged in any form of child labour by sex.</p> <p>The term child labour reflects the engagement of children in prohibited work and, more generally, in types of work to be eliminated as socially and morally undesirable</p> <p><b>Standard classification used and manual followed:</b></p> <p>ILO Minimum Age Convention, 1973 (No. 138), and the Worst Forms of Child Labour Convention, 1999 (No. 182), their respective supplementing Recommendations (No. 146 and 190), and the United Nations Convention on the Rights of the Child</p>	Percent	The number of children aged 5–17 years and engaged in child labour divided by the total number of children aged 5 – 17 years expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age • 5 – 11 • 12 – 13 • 14 - 17 Region Industry/ Sector Occupation	ALFS reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.6:</b> Proportion of the working age population employed by sex.	<p>This is the proportion of the working-age population involved in the production of goods and services for pay or profit to the working age population<sup>22</sup></p> <p><b>Standard classification used and manual followed:</b></p> <p>Employment is as defined by the 19th International Conference of Labour Statisticians (ICLS).</p>	Percent	Employed population aged 14 – 64 years divided by total working age population (14 – 64 years), expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age Region Industry/ Sector Occupation	ALFS reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.7:</b> Employment rate of persons aged 25-49 (with a child under age 3 living in a household and with no children living in the household), by sex	<p>This is the proportion of the population 25-49 living in a household with a child under age 3 years and involved in the production of goods and services for pay or profit to the working age population.</p> <p><b>Standard classification used and manual followed:</b></p> <p>Employment is as defined by the 19th International Conference of Labour Statisticians (ICLS).</p>	Percent	Employed population aged 25-49 years and living in a household with a child under 3 years divided by total population (25-49 years) living in a household with a child under age 3 years, expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age Region Industry/ Sector Occupation	ALFS reports UBOS Annual Statistical Abstract UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.8:</b> Vulnerability employment rate	<p>This is the proportion of employed population who are classified as vulnerable on grounds of being either own – account and contributing family workers</p> <p><b>Standard classification used and manual followed:</b></p> <p>Employment is as defined by the 19th International Conference of Labour Statisticians (ICLS).</p>	Percent	Divide the vulnerable employed persons (own-account workers or contributing family workers) by the total employed persons of working age (14 – 64 years), expressed as a percentage	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex Residence Age Region	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations

<b>11.16:</b> Informal employment as a proportion of total non-agricultural employment, by sex.	This refers to the contribution of informal employment in non-agricultural employment to the total non-agricultural employment  Informal employment includes: owner account workers and employers in their informal sector enterprise, contributing family workers, employees in informal jobs, members of the informal producers' cooperatives and own account workers engaged in production of goods exclusively for own final use.	Percent	The number of employed persons in non-agricultural informal employment divided by the total non-agricultural employment expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed.	Annual Labour Force Survey (ALFS)	Sex  Residence Age Region	ALFS reports  UBOS Annual Statistical Abstract  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Annually	Can also be obtained from the UNHS and UNPS

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.17:</b> Proportion of firms owned by women, by size.	This is the share of the business enterprises (irrespective of size) which are owned by women.  <b>A Business enterprise</b> is a group of business establishments under one entrepreneurial structure.	Percent	Number of Business enterprises owned by women divided by total number of businesses, expressed as a percentage	The information is collected from a Census of Business Enterprises (COBE), captured and analysed to derive the indicator.	Census of Business Enterprises (COBE)	Residence Region Size of Business Industry	COBE Reports  UBOS Website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 10 years	None
<b>11.18:</b> Average number of hours a week spent on unpaid domestic and care work by sex	This refers to the average time spent per week on unpaid domestic and care work by sex <sup>23</sup>	Number (Hours)	Total number of hours a week spent on unpaid domestic and care work divided by the total population	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Residence Sex Age Region Wealth quintile Marital status	UNHS reports  UBOS Annual Statistical Abstract  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 3 Years	The current UNHS surveys do not capture all aspects of unpaid care workers and voluntary work  Can also be got from Time Use Surveys

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.19:</b> Average time taken ( <i>Minutes</i> ) to & fro the firewood supply point by sex of household head.	The average time taken travelling to and from the main source of firewood	Minutes	Total number of hours spent to and from the firewood supply point divided by the total population engaged in collecting the firewood	Household information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Residence Sex of household head Region Wealth quintile	UNHS reports	Every 3 years	Can also be obtained from the UNPS
<b>11.20:</b> Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care.	This is an indicator measuring specific decisions by women (aged 15-49) on their own sexuality and reproduction. Interviewees will have to provide a “yes” answer to all three questions in order to count as a woman who makes her own sexual and reproductive decisions. The first question looks at the ability to say no to sexual intercourse as a critical condition of sexual autonomy. The second question measures the woman’s decision concerning using or not using contraception. The third question measures the woman’s decision about reaching sexual and reproductive health-care for her.	Percent	The number of women (aged 15-49 years) who can have right to take decision as per definition/total number of women aged 15-49 years multiplied by 100	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS). The information is collected from a representative sample of households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Age Residence Region Wealth quintile	UDHS Report UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 Years	None

<b>11.21:</b> Proportion of seats held by women in the national Parliament	This is the proportion of seats held by women in (political leadership positions) the Legislative Assembly of the country.	Percent	Number of seats held by women in the Legislative Assembly divided by the total number of seats in the Legislative Assembly, expressed as a percentage	Data is obtained from administrative reports, captured and analysed to derive the indicator	Parliament website;	Type of constituency	Parliament website ( <a href="http://www.parliament.go.ug">www.parliament.go.ug</a> );	Every 5 years	Can be obtained from the Electoral Commission
<b>11.22:</b> Proportion of seats held by women in Local Governments.	This is the proportion of positions held by women in (political leadership positions) in the Local Government of the country	Percent	Number of positions held by women in Local Governments divided by the total number of positions in the Local Governments, expressed as a percentage	Data is obtained from administrative reports captured and analysed to derive the indicator.	Ministry of Local Governments (MoLG);	LG Level	MoLG;	Every 5 years	Can be obtained from the Electoral Commission
<b>11.23:</b> Proportion of women in managerial positions in the formal sector.	This is the proportion of positions held by women in managerial positions in the formal sector  <b>Standard classification used and manual followed:</b>	Percent	Number of managerial positions held by women in the formal sector divided by the total number of managerial positions, expressed as a percentage	Data is obtained from the payrolls of the various organisations and aggregated to compute the indicator.	Ministry of Public Service (MOPS)	Sector Level	MOPS Annual Reports	Annual	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.24:</b> Proportion of the ever-partnered population aged 15+ subjected to physical, sexual or psychological violence by a current or former intimate partner, in the last 12 months by sex.	There are three forms of violence namely physical, Sexual and Psychological violence. <b>Physical</b> violence consists of acts aimed at physically hurting the victim. <b>Sexual</b> violence is defined as any sort of harmful or unwanted sexual behaviour that is imposed on someone. <b>Psychological</b> violence includes a range of behaviours that encompass acts of emotional abuse and controlling behaviour. <sup>24</sup>	Percent	Number of ever-partnered women and girls (aged 15 years and above) who experience the violence (type) by a current or former intimate partner in the previous 12 months divided by total number of ever-partnered women and girls (aged 15 years and above), expressed as a percentage	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS).  The information is collected from a representative sample of households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)  Data on violence can also be obtained from the National Gender Based Violence Database (NGBVD)	Age  Residence  Region  Wealth quintile	UDHS Reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	Can also be obtained from the M G L S D website ( <a href="http://www.mglsd.go.ug">www.mglsd.go.ug</a> )

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.25:</b> Proportion of the population aged 15 years and older subjected to sexual violence by persons other than an intimate partner, in the previous 12 months, by age and sex.	Sexual violence is defined as harmful or unwanted sexual behaviour that is imposed on someone. It includes acts of abusive sexual contact, forced engagement in sexual acts, attempted or completed sexual acts without consent, incest, sexual harassment, etc.	Percent	Number of women and girls (aged 15 years and above) who experience sexual violence by persons other than an intimate partner in the previous 12 months/ Number of women and girls (aged 15 years and above)], expressed as a percentage	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS).  The information is collected from a representative sample of households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)  Information on violence can also be obtained from the National Gender Based Violence Database (NGBVD)	Age  Residence  Region  Wealth quintile	UDHS Reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )  MGLSD website ( <a href="http://www.mglsd.go.ug">www.mglsd.go.ug</a> )	Every 5 years	Can also be obtained from the MGLSD website ( <a href="http://www.mglsd.go.ug">www.mglsd.go.ug</a> )
<b>11.26:</b> Proportion of the population aged 20-24 and 25-29 years who experienced sexual violence by age 18 by sex	This indicator provides the proportion of young women and men aged 15-24 years who report having experienced any sexual violence by age 18 <sup>25</sup> .	Percent	It is calculated by dividing the number of young women and men aged 18-24 years who report having experienced any sexual violence by age 18 by the total number of young women and men aged 15-24 years, respectively, in the population.	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS).  The information is collected from a representative sample of households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)  Information on violence can also be obtained from the National Gender Based Violence Database (NGBVD)	Age  Residence  Region  Wealth quintile	UDHS Reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>11.27:</b> Proportion of the population aged 20-24 who were married or in a union before age 18 by sex.	This indicator provides the proportion of women who were first married or in union by age 18, i.e. Child marriages.  Marriage is defined as 'Living together as husband and wife'	Percent	Divide the number of women aged 20-24 who were first married or in union by age 18 by the total number of women aged 20-24 in the population, expressed as a percentage.	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS).  The information is collected from a representative sample of households, captured and analysed to derive the indicator.	Uganda Demographic and Health Survey (UDHS)	Age Residence Region Wealth quintile	UDHS Reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	Every 5 years	None
<b>11.28:</b> Proportion of girls and women aged 5 years and above who have undergone FGM/C	This indicator provides the proportion of girls and women aged 5 years and above who have undergone female genital mutilation/cutting (FGM/C).	Percent	It is calculated by dividing the number of girls and women aged 5+ who have undergone FGM/C by the total number of girls and women aged 5+ in the population.	Data to derive the indicator is obtained from Uganda Demographic and Health Surveys (UDHS).  The information is collected from a representative sample of households, captured and analysed to derive the indicator. <b>11.32: Uganda Social Institutions and Gender Index</b>	<p>This is a measure of the underlying social institutions that influence gender roles and relations.</p> <p>The index provides additional insight into the causes of gender inequality.</p> <p>Social Institutions (SIs) are formal and informal laws, social norms and practices that shape or restrict the decisions, choices and behaviours of individuals groups and communities (<a href="http://www.genderindex.org">www.genderindex.org</a>).</p>	Index Number	<p>The USIGI is a composite index of 12 indicators under 5 dimensions.</p> <ul style="list-style-type: none"> <li>o Discriminatory Family Code (DFC),</li> <li>o Restricted Physical Integrity (RPI),</li> <li>o Son Preference (SP),</li> <li>o Restricted Resources and Assets (RRA)</li> <li>o Restricted Civil Liberties (RCL).</li> </ul> <p>Each of the SIGI indicators is coded between 0, meaning no inequality, and 1, indicating very high inequality.</p>	<p>USIGI- The information is collected from a representative sample of households, captured and analysed and analysed at UBOS.</p> <p>The data set is then used to compile the index.</p>	USIGI	<p>Sub-index Region and Sub-regional</p>	<p>USIGI report UBOS website (<a href="http://www.ubos.org">www.ubos.org</a>)</p>	TBD	<p>Was derived from special surveys (2012 and 2014)</p>

## 5.12. Water and Environment Sector Indicators

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>12.1:</b> Proportion of households with access to improved water source	Safe water points include boreholes, piped water public taps, tap water and protected springs, gravity flow schemes, rain water and bottled water	Percent	Divide the number of using an improved water source by the total number of households, expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex of household head Residence Region Wealth quintile	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	3 years	None
<b>12.2:</b> Average time taken ( <i>Minutes</i> ) to & fro the water (safe) supply point by sex of household head.	This is the average time spent travelling to and from the safe water source.  Safe water points include boreholes, piped water public taps, tap water and protected springs, gravity flow schemes, rain water and bottled water	Minutes	Summation of the average time taken to and fro the safe water supply point divided by the total number of households	The information is collected from a nationally representative sample of the households, captured and analysed.	Uganda National Household Survey (UNHS)	Sex of household head Residence Region Wealth quintile	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	3 years	None

Indicator Name	Definition and Standard Classifications	Unit of Measure	Computation Method	Compilation Practices	Sources of data	Disaggregation	Accessibility and Availability of data	Periodicity of Production	Comments and limitations
<b>12.3:</b> Average waiting time ( <i>Minutes</i> ) at the water (safe) supply point by sex of head.	This is the average time spent at the safe water source.  Safe water points include boreholes, piped water public taps, tap water and protected springs, gravity flow schemes, rain water and bottled water	Minutes	Summation of the average time spent at the safe water supply point divided by the total number of households	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex of household head Residence Region Wealth quintile	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	3 years	None
<b>12.4:</b> Proportion of households with access to improved sanitation by residence	Improved toilet facilities include any non-shared toilet of the following types: flush/pour flush toilets to piped sewer systems, septic tanks, and pit latrines; ventilated improved pit (VIP) latrines; pit latrines with slabs; and composting toilets.	Percent	Divide the number of using an improved toilet facility by the total number of households, expressed as a percentage.	The information is collected from a nationally representative sample of the households, captured and analysed to derive the indicator.	Uganda National Household Survey (UNHS)	Sex of household head Residence Region Wealth quintile	UNHS reports  UBOS website ( <a href="http://www.ubos.org">www.ubos.org</a> )	3 years	None

## 6. Participating agencies

The Uganda Bureau of Statistics (UBOS) would like to acknowledge all the stakeholders who contributed to the updating of the National Priority Gender Equality Indicators (NPGEIs). These are:

1. DFID
2. The technical Team from UN Women
3. The Gender Statistics Advisory Group
4. The UBOS Gender Statistics Committee
5. The Coordinating Team at UBOS
6. The respondents to the Sector consultations
7. Participants at the Validation Meeting and Dissemination Workshop; and
8. The Consultant.

To all the above, we are highly indebted.

### (Footnotes)

- 1 NEET - Neither in Employment nor in Education /Training
- 2 NSI – National Standard Indicators; NDP II - 2<sup>nd</sup> National Development Plan; SDGs – Sustainable Development Goals; and UN-MSGI – UN Minimum Set of Gender Indicators.
- 3 Stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards)
- 4 Malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards)
- 5 ARI symptoms consist of cough accompanied by (1) short, rapid breathing that is Chest-related and/or (2) difficult breathing that is chest-related.
- 6 NEET - Neither in Employment nor in Education /Training
- 7 Figures are for non-spousal sexual violence
- 8 RMNCAH – Reproductive Maternal Neo-natal Child and Adolescent Health Sharpened Plan for Uganda 2016/17 – 2019/20
- 9 SDG Target 4.1.1: Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics by sex.  
  
SDG Target 4.6.1: Percentage of population in a given age group achieving at least a fixed level of proficiency in functional (a) literacy and (b) numeracy skills by sex.
- 10 The international poverty line is a monetary threshold under which an individual is considered to be living in poverty. It is calculated by taking the poverty threshold from each country – given the value of the goods needed to sustain one adult – and converting it into dollars. The international poverty line was originally set to roughly \$1 a day. When purchasing power parity and all goods consumed are considered in the calculation of the line, it allows organizations to determine which populations are considered to be in absolute poverty.

- 11 LSTPs have been developed and are already in the public domain, for example, draught animals save time in land preparation or relieve the burden of carrying heavy loads; Conservation Agriculture reduces the time spent on crop establishment and weeding; roof water harvesting reduces the need to carry water home; and mills save time and energy pounding maize.
- 12 For the Annual School Census, Pre-designed questionnaires are administered to the heads of school through the respective DEOs and after completion, they are returned to the Ministry Headquarters. The data is cleaned and analysis is done using SQL server 2012.
- 13 Distortions may arise from incorrect distinctions between new entrants and repeaters especially in the first grade of secondary education. Students who interrupted their studies after one or more years after primary seven together with the migrant students could also affect the quality of the indicator. A study should be undertaken to ascertain the different ages of the school going children.
- 14 This indicator can be distorted by incorrect classification between new entrants and repeaters especially in the first grade of secondary education. Students who interrupted their studies after one or more years after primary seven together with the migrant students could also affect the quality of the indicator. A study should be undertaken to ascertain the different ages of the school going children
- 15 From non-solid fuels to clean fuels Current global data collection focuses on the primary fuel used for cooking, categorised as solid or non-solid fuels, where solid fuels are considered polluting and non-modern, while non-solid fuels are considered clean. This single measure captures a good part of the lack of access to clean cooking fuels, but fails to collect data on type of device or technology is used for cooking, and also fails to capture other polluting forms of energy use in the home such as those used for lighting and heating.
- 16 Antenatal care coverage (at least one visit) is the percentage of women aged 15-49 with a live birth in a given time period that received antenatal care provided by skilled health personnel at least once during their most recent pregnancy.  
  
Antenatal care coverage (at least four visits) is the percentage of women aged 15-49 with a live birth in a given time period that received antenatal care four or more times during their most recent pregnancy.
- 17 Measure 2012 quoting WHO 2010
- 18 OECD - The AIDS / HIV prevalence rate in selected populations refers to the percentage of people tested in each group who were found to be infected with HIV.
- 19 An individual owns a mobile cellular phone if he/she has a mobile cellular phone device with at least one active SIM card for personal use. Mobile cellular phones supplied by employers that can be used for personal reasons (to make personal calls, access the Internet, etc.) are included. Individuals who have a mobile phone for personal use that is not registered under his/her name are also included. An active SIM card is a SIM card that has been used in the last three months. Individuals who have only active SIM card(s) and not a mobile phone device are excluded.  
  
A mobile (cellular) telephone refers to a portable telephone subscribing to a public mobile telephone service using cellular technology, which provides access to the PSTN. This includes analogue and digital cellular systems and technologies such as IMT-2000 (3G) and IMT-Advanced. Users of both postpaid subscriptions and prepaid accounts are included
- 20 Informal employment includes persons employed as a) own-account workers and employers employed in their own informal enterprises; b) members of informal producers' cooperatives; c) contributing family workers, irrespective of whether they work in formal or informal enterprises; d) employees holding informal jobs in formal enterprises, informal enterprises, or as paid domestic workers employed by households; e) own-account workers engaged in the production of goods exclusively for own final use by their household.
- 21 NEET - Neither in Employment nor in Education /Training
- 22 A person of specified age, is considered employed if during a specified brief period of one week was; in paid employment (employees) or self-employment (employers, own account workers, members of producers' cooperatives, contributing family workers).
